Sheer  
Driving Pleasure

# THE BMW 1 SERIES CONVERTIBLE. PUTS THE SUN IN THE SHADE.

**BMW EfficientDynamics**  
Less emissions. More driving pleasure.

International version. Please contact your local dealer for country specific information.

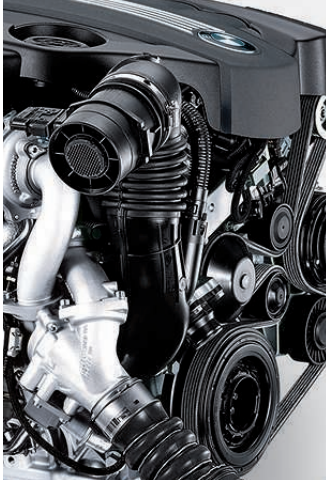

## A 365-DAY HOLIDAY.

Hardly anything changes a city more than a sunny day, or a warm summer night. People bloom and appear to spend their entire lives outside. With the BMW 1 Series Convertible you can do something similar – and take the joy of driving into the open air. Enjoy its outstanding handling, use the internet on the move and arrange to meet your friends, or simply enjoy the stylish interior that always remains pleasantly cool, even with the roof down. With this car, when the sun's out, it will always follow you. As will the admiring glances.

The BMW 1 Series Convertible

JOY FOR ALL SEASONS.

- 06 Exterior  
Conviction in every line.
- 08 Highlights  
Innovative light design.
- 10 BMW EfficientDynamics  
Sustainable thinking.
- 12 Performance  
Inspiring power.
- 14 Driving experience  
Perfectly fine-tuned.
- 16 BMW ConnectedDrive  
Your network.
- 18 Roof  
Wonderful views.
- 20 Curtain up  
The BMW 1 Series Convertible with Air Curtain.
- 22 Interior  
Quality, elegance, spaciousness.
- 26 City, Country, Coast  
To Vancouver Island in the BMW 1 Series Convertible.

Editorial

JOY AT THE TOUCH OF A BUTTON.

City life can be fast and intense, so it's important to make the most of your free time. One way to do this is to choose a car with the enjoyment factor firmly built in. The BMW 1 Series Convertible is one such car. A touch of a button to fold down the roof on the morning drive to work, the lunchtime trip to the gym or a drive to an evening party with friends instantly transforms the experience into something very special.

It takes just 19 seconds to open the roof, giving driver and passengers perfect views of the skies and, thanks to the classic convertible profile, an uninterrupted all-round outlook. But it's not just the views. The immediate surroundings are also a source of delight for all. The white interior trim, for instance, harmonises with new upholstery colours and exclusive paintwork. The picture is just as appealing on a practical level. The BMW 1 Series Convertible, with its BMW EfficientDynamics technology, eases the pressure of city life with fewer fuel stops and low emissions. The same technology means greater performance and increased driving pleasure, too. There's also unlimited onboard entertainment thanks to the very first BMW App. Together with an Apple iPhone, the App gives you access to internet radio from around the world or connects with your Facebook account.

[www.bmw.com/1seriesconvertible](http://www.bmw.com/1seriesconvertible)

Equipment of model shown: BMW 123d

Engine: BMW TwinPower Turbo four-cylinder diesel engine  
Output: 150 kW (204 hp)  
Wheels: 17" light-alloy wheels Streamline 370 with mixed tyres  
Exterior colour: Vermilion Red Metallic  
Upholstery: Boston leather Oyster  
Interior trim: Fine-wood trim, Walnut light

For information on fuel consumption CO<sub>2</sub> emissions see pages 64 | 65.

# THE MOST BEAUTIFUL SKYLINE IN TOWN.

The profile of the BMW 1 Series Convertible.

## THE NIGHT GETS A NEW FACE.

Innovative light design.

Rediscover the world by day and by night, enjoy the freedom, feel alive. With its long sweeping bonnet, distinctive shoulderline and flat rear, the convertible is shaped like the deck of a speed boat. And when the wind streams over the harmonious lines of the BMW 1 Series Convertible, joy becomes a tangible experience. The short, acute A-pillar and the high-quality soft top reinforce the open-air feel in this special convertible.

Whether you're cruising along or driving through town, this car's sporty looks will always turn heads. The sharply angled front headlights focus constantly on the road. Together with the optional Xenon headlights, the white accent lights reinforce the front design, while the rear lights – optionally with LED technology – give the night a deep red illumination and emphasise the athletic character of the BMW 1 Series Convertible.

➤ [www.bmw.com/1seriesconvertible/design](http://www.bmw.com/1seriesconvertible/design)  
➤ [www.bmw.com/1seriesconvertible/openair](http://www.bmw.com/1seriesconvertible/openair)

## TAKES YOUR BREATH AWAY. AND THE WIND RESISTANCE.

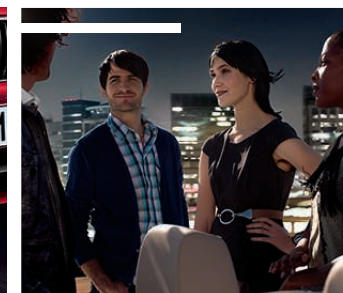

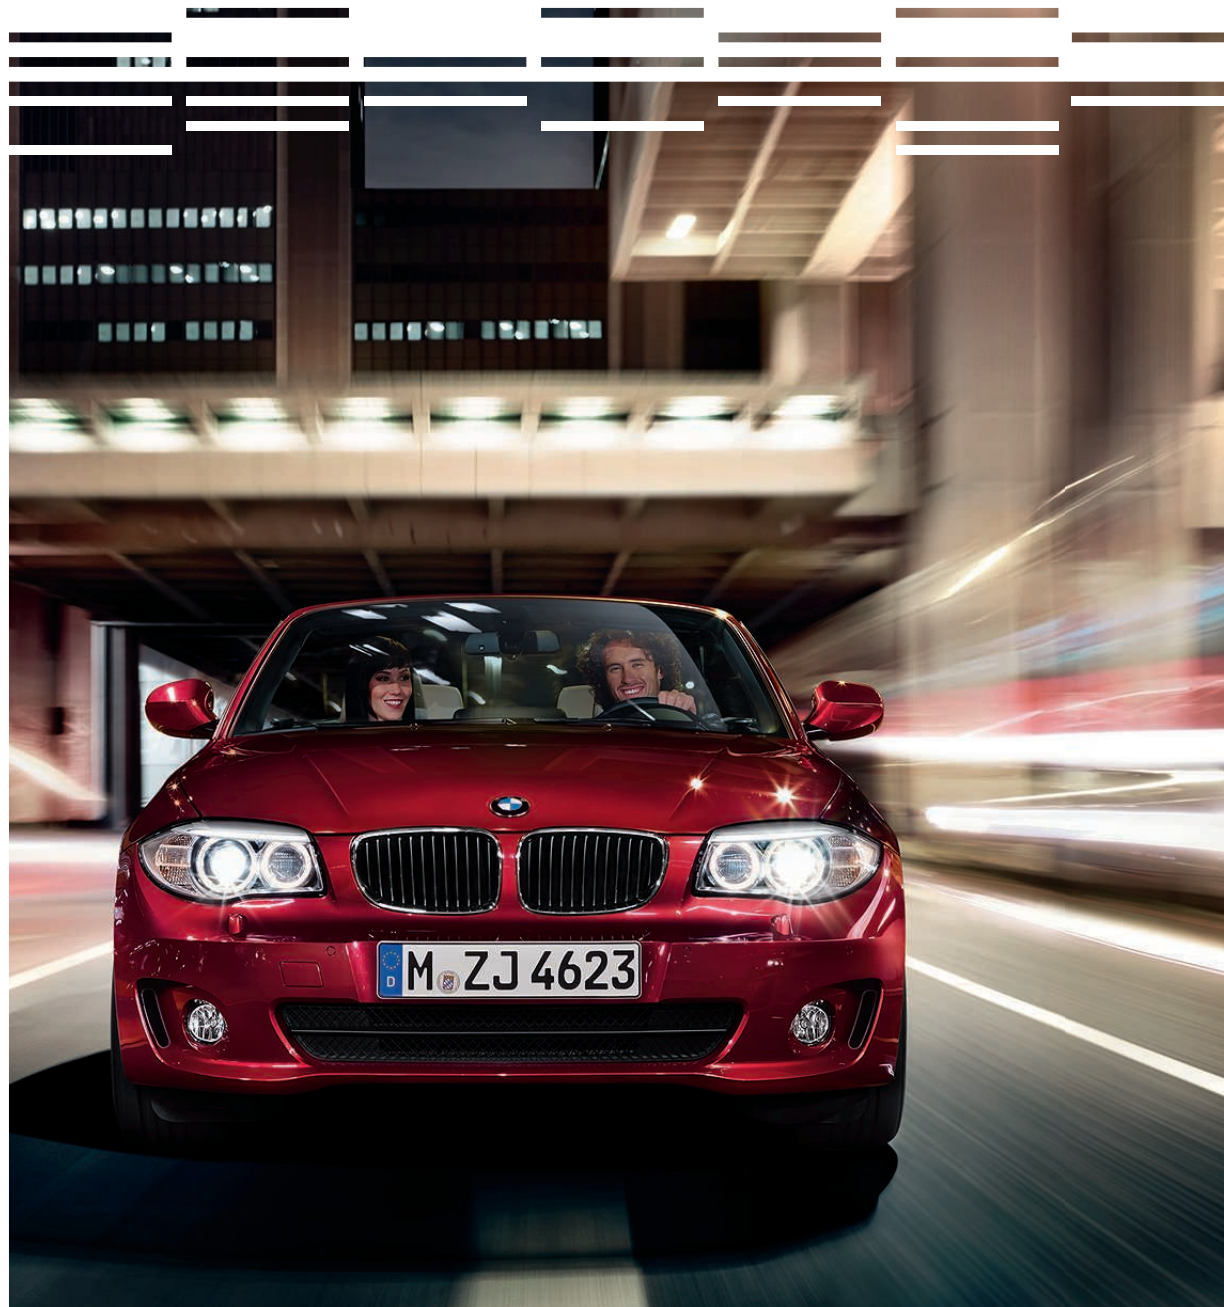

Air Curtain – unique  
BMW EfficientDynamics technology.

Dynamics, elegance, athleticism – all remarkable properties of the BMW 1 Series Convertible. Advanced fuel-saving and CO<sub>2</sub>-reducing technologies can be added to that list, making this car a shining example of the BMW EfficientDynamics philosophy. One particularly distinctive feature is the front apron air inlet for the unique Air Curtain (not in conjunction with the BMW 135i). Used for the first time in the BMW 1 Series Convertible, it combines with the 17" Streamline 370 Aero wheels to significantly reduce

air resistance, thus cutting down on fuel consumption and CO<sub>2</sub> output. Additionally, the Aero wheel well helps cool the brakes.

Needless to say, BMW 1 Series Convertible has, as standard, even more BMW EfficientDynamics technologies: namely, Brake Energy Regeneration, reduced rolling resistance tyres, Optimum Shift Indicator and Electric Power Steering. There's even some satisfaction to be had in stop-start traffic, as you will save fuel thanks to the Start/Stop function. When the road does open up again, you can enjoy the sense of freedom to the full in the BMW 1 Series Convertible.

➔ [www.bmw.com/1seriesconvertible/aerodynamics](http://www.bmw.com/1seriesconvertible/aerodynamics)

# SOAK UP MORE SUN THAN FUEL.

Less emissions, more driving pleasure.

For all its elegance, the BMW 1 Series Convertible remains true to its sporty genes. Its engines make this point with total clarity. The 123d, for example, is the most powerful of diesel engines. The four-cylinder BMW TwinPower Turbo also combines low fuel consumption with its high performance. The figures speak for themselves: 5.3 litres per 100 kilometres and 150 kW (204 hp).<sup>1</sup>

As for the petrol engines, the top-line 135i powerplant with BMW TwinPower Turbo technology displays extremely impressive power delivery. There's also a six-cylinder in-line 125i engine which, above all, convinces with its lightweight engineering and 160 kW (218 hp)<sup>1</sup> performance. Fuel efficiency, as you might expect, is a strong point. All in all, the BMW 1 Series Convertible powerplants illustrate why engines are described as the heart of the vehicle – and why your heart beats faster.

[www.bmw.com/1seriesconvertible/efficientengines](http://www.bmw.com/1seriesconvertible/efficientengines)

<sup>1</sup> For information on fuel consumption and CO<sub>2</sub> emissions, see 64 | 65.

**50:50 WEIGHT  
DISTRIBUTION,  
100% DRIVING  
PLEASURE.**

Classic BMW – perfectly balanced performance.

Agility, power and driving pleasure – rear-wheel drive marks out the BMW 1 Series Convertible as a thoroughbred BMW. The ideal 50:50 axle load distribution and Active Steering (six-cylinder only) combine to give outstanding road performance – for more joy on every curve. Further technologies ensure the convertible stays true to its name and, above all, true to the road. Convertible-specific, ultra-precise suspension tuning, an extremely rigid bodyshell and Dynamic Stability Control (DSC) guarantee optimum directional stability so you and your passengers arrive safely at your destination. But with one consequence: you may not want to get out again.

**BMW ConnectedDrive**  
In touch with your world.

# YOUR MOBILE SOCIAL NETWORK.

Get connected with  
BMW ConnectedDrive\*.

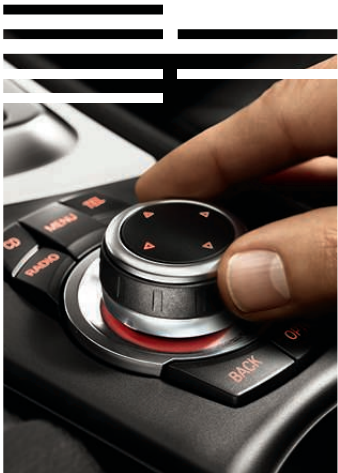

The freedom you feel when driving a convertible is reflected in the seemingly unlimited possibilities of BMW ConnectedDrive. Have you discovered a great new place? Put it on Twitter. Want to get your friends together for an evening beach party? Arrange to meet them on Facebook. Read your status reports wherever you are, post updates from the car, make new friends along the way – all this is possible via the optional iPhone BMW App.

BMW ConnectedDrive is the intelligent networking of driver, vehicle and the outside world. And it's particularly suitable for the convertible driver. Not only can you plan the perfect route from home and send it to your optional BMW navigation system, you can also display the weather forecast and photos of your destination. And yet a drive can only be made perfect with the right music, which is where the optional USB/audio interface (available in combination with navigation, mobile phone preparation or hands-free system) for your MP3 player comes in. You can even display the album cover on the Control Display.

\* May not be available in all countries. Please consult your BMW partner.

You can also operate these functions via the optional iDrive system. By turning, pressing and manoeuvring the iDrive Controller, you are guided intuitively through all the Entertainment and Communications functions. The high-definition 8.8" colour display (6.5" on the Business navigation system) shows the functions and takes you on a journey into the world of the internet.

➔ [www.bmw.com/1seriesconvertible/connectivity](http://www.bmw.com/1seriesconvertible/connectivity)

# NEVER WAS THE ROAD CLOSER TO THE SKY.

Beautiful views at the touch of a button –  
in just 19 seconds.

# CURTAIN UP.

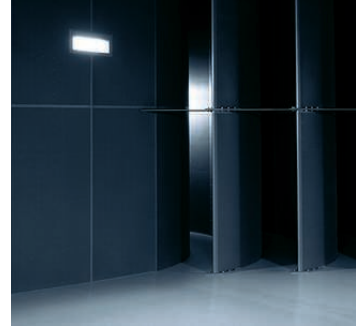

The Air Curtain in the BMW 1 Series Convertible and Coupé was developed in the stream of a new high-tech wind tunnel. It's innovative technology that reduces air resistance to great effect.

In the large wind tunnel at BMW Group's Aerodynamic Test Centre in Munich, reality is turned on its head. It is not the car that moves but the surroundings. A rotor with an eight metre diameter (photo, left) and up to 4.4 megawatts of power input (around 6,000 hp) propels 18,000 cubic metres of air into circulation through a closed channel. In front of the test track, the air is forced through a jet and accelerated six-fold to up to 300 km/h. The road is simulated through five belts made of thin sheet steel. Four small belts drive the wheels. At an exact and constant speed, the central 10 metre-long belt moves underneath the car. The result: the airflow on the undercarriage and on the wheels and wheel wells is almost exactly the same as on the road. The road is basically brought to the test track. It is 22 metres long, 16 metres wide and 13 metres high. A wind palace. A 10% reduction in air resistance means, in practice, a reduction in consumption of a good 2.5%. From an aerodynamic point of

view, the bodywork design has been virtually perfected although it only accounts for 40% of air resistance. Cooling air for the engine, transmission and brakes accounts for 10%, 20% comes from the vehicle's undercarriage and a further 30% is created on the wheels and in the wheel wells. Clearly, then, there remains great potential for improvement – and one such improvement is what we are calling the Air Curtain. Developed at the Aerodynamic Test Centre, this innovation celebrated its world premiere in the BMW 1 Series Convertible and Coupé. The Air Curtain protects the front wheels from the airstream. It does this by routing air that streams in through openings in the front apron into narrowing channels towards the wheel wells where it emerges at high speed from narrow slits and hangs like a curtain over the outer wheel wing. An invisible wheel panel – completely unobtrusive but extremely effective. Thanks to the Air Curtain, the optimisation of cooling air flow

and the smoothing of the undercarriage, the BMW 1 Series Convertible and Coupé not only achieve an excellent aerodynamic drag value, but also impress with reduced lift on the rear axle. And that means lower fuel consumption and even greater driving stability.

Behind the test area, high semi-circular shields steer the airstream in the opposite direction.

Left: aerodynamic tests in the huge test facility are controlled from the control unit of the wind tunnel.

Right: a smoke stream makes the airflow around the BMW 1 Series Convertible visible. The less turbulence that forms, the lower the air resistance.

## CHILLOUT AMBIENCE ON THE MOVE.

Quality that stirs all the senses.

Race with the wind and enjoy the sun. It's all pure joy in the BMW 1 Series Convertible. Elegant, sporty, modern – the interior combines all of these values to create a very special mood. Fine materials and craftsmanship make it better still.

The subtle elegance of the Oyster leather, for example, contrasts with the optional light walnut fine-wood interior trim. The ergonomically designed seats with soft leather covers (optional) remain pleasantly cool even on a hot summer day thanks to innovative SunReflective technology with reflective colour pigments in the leather. Climb in and experience an interior that could even be considered too beautiful to cover with a roof.

[www.bmw.com/1seriesconvertible/interiordesign](http://www.bmw.com/1seriesconvertible/interiordesign)

# THE FOUR MOST BEAUTIFUL PLACES IN THE SUN BELONG TO YOU.

More rear space for more spontaneity.

Whether it's shopping, luggage or a beach mat and sunshade, there's a place for everything in the BMW 1 Series Convertible. If you want even more versatility, there's also the optional through-loading system with transport bag. Your passengers will enjoy great comfort on two full-size rear seats even when the roof is up, so nothing can get in the way of a perfect day. When you're not enjoying the open air and the sun, the high-quality soft-top available in Black, Beige or Anthracite is impressive in itself. And when the mood takes you, or the weather changes, a simple touch of a button is all it takes to fold down the roof of the BMW 1 Series Convertible.

What's more, the temperature remains as constant as the driving pleasure when you opt for automatic air conditioning with convertible mode. When you open the roof, the climate automatically adjusts according to the surrounding temperature, solar radiation and driving speed. Just another example of the flexibility of a car with one core goal: the joy of driving a convertible.

09.15

The beaches around Victoria on Vancouver Island are a popular spot for kite surfers.

11.20

The parks of Vancouver are the right place for a picnic in the middle of the city.

## CITY, COUNTRY, COAST.

No other city offers the proximity of business and leisure quite like Vancouver. Only a few miles separate the city centre from the Pacific Ocean. Climb into the BMW 1 Series Convertible with us and experience a typical weekend trip to the beach.

14.15

The Canadian Pacific coast offers a wealth of photo opportunities.

16.30

With any luck you will spot whales from the beach.

Thomas wants to explore a beautiful stretch of coastline in his BMW 1 Series Convertible, Alice wants to go whale watching and I'd like to surf. All no problem if you live in Vancouver on the Canadian Pacific Coast. After a short consultation over cappuccinos and croissants, the plan for the weekend takes shape. We are going to shop for a picnic in the deli market on Granville Island. This covered market is the first stop for fruit, cheese and pastries. The picnic spot, Vanier Park, is close by and there's a beautiful view of the city skyline. Afterwards we plan to drive on towards Vancouver Island and the old colonial town of Victoria. The Pacific Ocean and Dwayne Strong's Kite Surf School await us there. Should the convertible mood take us and the weather is fine, we will cruise on towards evening for whale watching at Broken Islands. Three people with weekend bags and a picnic basket travel comfortably in the BMW 1 Series Convertible. Most of the small items fit into the practical compartments in the instrument panel or in the nets on the back of the front seats as well as in the boot. Even with the roof down, the 260-litre boot space is sufficient for three medium-sized travel bags. With more luggage, the through-loading function would serve admirably. The picnic basket fits on the empty space on the rear seat. Only the kite board is rented on-site as the Surf School on Vancouver Island has very decent kit and the constant south-east

wind does not go unused. It's certainly too late to make the return journey today. Sooke Harbour House still has rooms available and with a bit of luck Alice will see her whale during dinner on the restaurant terrace.

### ROOM FOR THE LUGGAGE.

2 trolley bags and a large travel bag. With the roof closed, luggage space is 305 litres.

3 medium-sized travel bags. The open soft top takes up little space in the boot. There is still 260 litres remaining.

3 friends with luggage and a picnic basket. Even with the roof down, it's no problem in the BMW 1 Series Convertible.

## BMW EfficientDynamics

Less emissions. More driving pleasure.

BMW was one of the first manufacturers to pursue the goal of efficient drive technologies, as part of its multi-award-winning sustainability strategy. BMW EfficientDynamics, included as standard, is a comprehensive technology package designed to reduce fuel consumption and emissions – while simultaneously enhancing dynamic performance. A winner of many technology awards, it has enabled the BMW Group to reduce the CO<sub>2</sub> emissions of its European new-vehicle fleet by about 30% since 1995. 39 models<sup>1</sup> currently produce less than 140 g of CO<sub>2</sub> per kilometre. The BMW Group intends to achieve a further 25% reduction in CO<sub>2</sub> emissions by 2020.

## BMW EFFICIENT DYNAMICS – MAKING A LITTLE GO A LONG WAY.

Different paths to the same destination: unmistakable BMW driving pleasure. Under the umbrella of the BMW EfficientDynamics project, BMW is continuously developing innovative systems that will bring us closer to the long-term goal of emission-free mobility. This BMW initiative for more driving pleasure is based on several pillars:

**Technology package.** The optimisation of vehicles powered by conventional diesel and petrol engines continues apace. A comprehensive technology package enables the reduction of fuel consumption and emissions, while at the same time increasing power output and driving enjoyment. These advances are based on innovations such as BMW TwinPower Turbo technology, the Auto Start/Stop function, Brake Energy Regeneration, and many others.

**BMW ActiveHybrid.** The BMW range includes impressive hybrid models, such as the new BMW ActiveHybrid 3<sup>2</sup> and BMW ActiveHybrid 5, and the BMW ActiveHybrid 7. All of these volume models combine high efficiency with superior dynamic performance.

**BMW ActiveE.** Since 2011, there has been a new type of dynamism on the road: the BMW ActiveE. Powered by electricity alone, it is manufactured in a small production run, as part of a pilot project. In this way, BMW is preparing the way for the emission-free mobility of tomorrow.

**BMW Hydrogen.** BMW is continuing its research into alternative drive concepts for the future, such as hydrogen drive.

**BMW i.** In line with the BMW EfficientDynamics idea, the BMW i brand is developing visionary new vehicle concepts such as the BMW i3 (Megacity Vehicle) and the BMW i8. While including existing BMW EfficientDynamics technologies, these vehicles also use new lightweight materials such as CFRP and electric drive systems with powerful battery technology such as BMW eDrive. With a focus on sustainability across the entire value-added chain and a range of supporting mobility services, BMW i is redefining individual mobility.

For further information see [www.bmw-i.com](http://www.bmw-i.com)

## BMW EFFICIENT DYNAMICS INNOVATIONS IN THE BMW 1 SERIES CONVERTIBLE, AT A GLANCE.

**Air Curtain.** Narrow openings in the left and right edges of the front apron direct incoming air into two enclosed channels. These lead to the wheel wells, where the departing air passes through a very narrow opening at high speed, right next to the outer edge of the wheel wing. The resulting air flow creates a kind of curtain alongside the front wheels, effectively reducing turbulence around the wheels and wheel wells, helping to reduce fuel consumption even further (not available for the 135i).

**Auto Start/Stop function.** BMW four-cylinder engines with six-speed manual transmission automatically switch off when the vehicle is stationary, when the driver uses the clutch and takes it out of gear, for instance at traffic lights or in a jam. As soon as the clutch is pressed again, the engine re-starts. This significantly reduces fuel consumption, especially in urban traffic.

**High Precision Injection.** BMW has located the injectors directly adjacent to the spark plugs. They inject fuel at high pressure and with extreme precision to ensure particularly efficient combustion.

**BMW TwinPower Turbo technology.** This new and innovative exhaust gas turbocharging system makes extremely efficient use of exhaust gas energy with the dual inflow of a TwinScroll turbocharger (135i). Valvetronic fully variable valve control and High Precision Injection work together to significantly reduce fuel consumption, while considerably improving performance over a wide rev range.

**Brake Energy Regeneration.** With this technology, the alternator generates electricity when the driver either takes his foot off the accelerator or applies the brakes. Previously unused kinetic energy is transformed into electrical energy and fed into the battery.

**Electric Power Steering.** Unlike traditional, hydraulic steering systems, Electric Power Steering uses energy only when the steering wheel is actively turned. On straight roads, the electric motor is inactive.

**Tyres with reduced rolling-resistance.** While a car is being driven, its tyres are constantly changing shape. This uses energy and thus fuel. Tyres with reduced rolling-resistance have an improved design and use special materials for their treads and sidewalls which limits deformation.

**Optimum Shift Indicator.** Changing gear at the right time is one of the easiest and most effective ways of saving fuel. This is where the Optimum Shift Indicator, combined with the six-speed manual transmission, comes in. It shows the driver which gear to select for the most efficient driving.

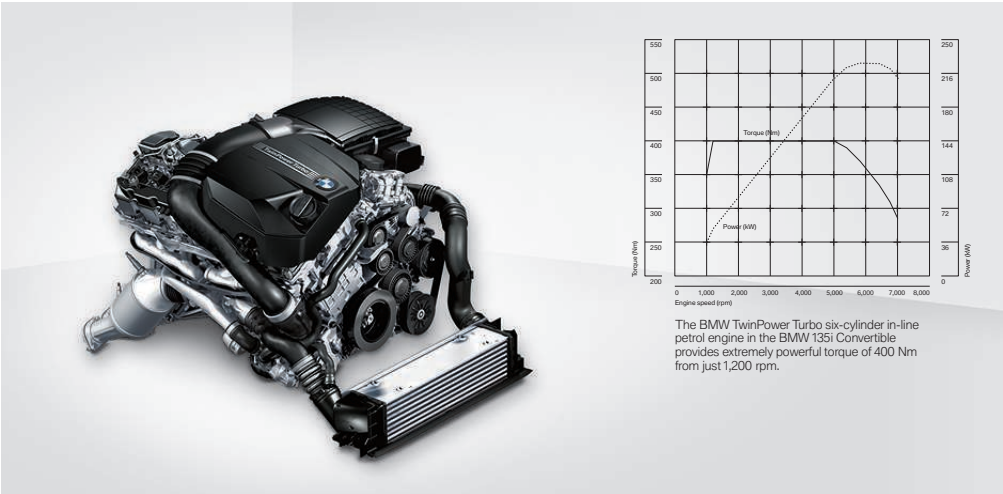

<sup>1</sup> Status 10/2011.

<sup>2</sup> Due to become available from 09/2012.

# EVERYTHING EVOLVES AROUND JOY. SEVERAL THOUSAND TIMES A MINUTE.

**Petrol engines.** Performance, power development and responsiveness are characteristic of every BMW engine. The same can be said for high efficiency. With all this in mind, all the engines offered in the BMW 1 Series Convertible adhere to the BMW EfficientDynamics philosophy, combining impressive power with low fuel consumption and minimised CO<sub>2</sub> emissions. Whatever engine you choose, maximum driving pleasure and superb efficiency are guaranteed.

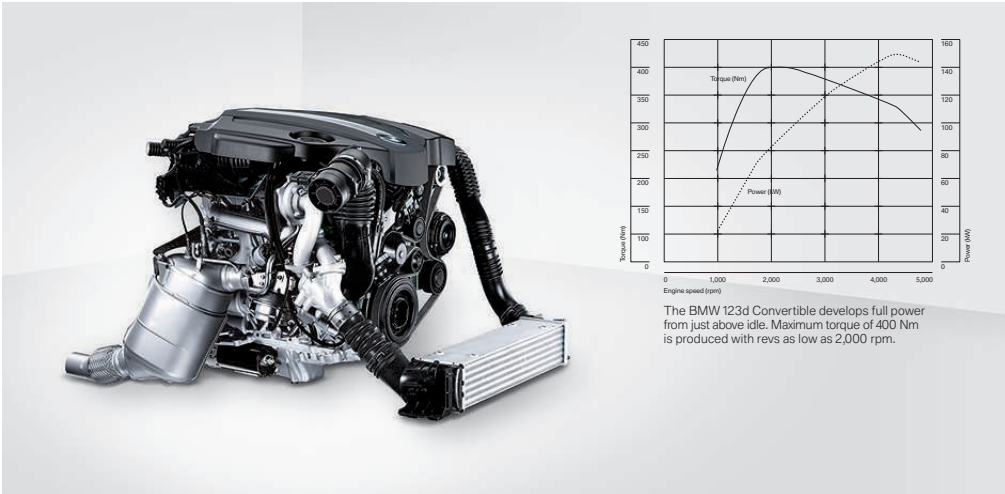

**BMW 135i.** The newly developed BMW TwinPower Turbo six-cylinder in-line engine is the first in its class to combine a TwinScroll turbocharger with High Precision Injection, Double VANOS and Valvetronic fully variable valve control. This innovative package reduces fuel consumption significantly and allows the engine to develop exceptional performance figures: 225 kW (306 hp)<sup>1</sup>, 400 Nm between 1,200 and 5,000 rpm, acceleration from 0 to 100 km/h in 5.6 seconds and a top speed of 250 km/h. Average fuel consumption is just 8.6 l/100 km. It's a combination of high emotion and frugal sense that makes the BMW 135i absolutely exceptional.

**BMW 125i.** The six-cylinder in-line engine is truly impressive, with spontaneous power development and superb responsiveness. The fully variable inlet valve lift provided by the Valvetronic system optimises air supply to the engine, especially under partial load. The result is more power with lower fuel consumption. Brake Energy Regeneration also helps the car make more efficient use of its fuel. The BMW 125i has average fuel consumption of 8.3 l/100 km. The powerful engine's 3.0-litre capacity develops peak torque of 270 Nm at 2,500 rpm, 160 kW (218 hp)<sup>1</sup> and accelerates the BMW from 0 to 100 km/h in around 6.8 seconds. Top speed: 238 km/h.

**BMW 120i.** The four-cylinder in-line engine generates 125 kW (170 hp)<sup>1</sup> from its 2.0-litre capacity, taking it from a standstill to 100 km/h in 8.4 seconds and on to a top speed of 220 km/h. With High Precision Injection and a leaner fuel-air mixture in the combustion chambers, the engine is particularly economical, especially under partial load. Further BMW EfficientDynamics measures help the BMW 120i Convertible to reach an average fuel consumption figure of 6.8 l/100 km.

**BMW 118i.** The free-revving character of this four-cylinder in-line engine with High Precision Injection takes it to 6,000 rpm and beyond. With 105 kW (143 hp)<sup>1</sup>, it accelerates the BMW 118i Convertible from 0 to 100 km/h in 9.3 seconds. Highly efficient combustion and BMW EfficientDynamics measures ensure low average fuel consumption of just 6.5 l/100 km.

**Diesel engines.** The three diesel powerplants available in the BMW 1 Series Convertible have impressive all-round capabilities. State-of-the-art CommonRail technology combines running smoothness and efficiency with spontaneous acceleration and superbly free-revving character. All the variants available are engineered in lightweight aluminium and, of course, come with a maintenance-free particle filter as standard.

**BMW 123d.** The world's first BMW TwinPower Turbo four-cylinder diesel engine with Variable Twin Turbo combines two turbochargers of different sizes. The first, smaller turbo provides instant responses at low revs, while the second, larger turbo gives a significant power increase as the revs climb. The all-aluminium crankcase also improves efficiency. The result is a unique relationship between performance and fuel consumption. In figures: 150 kW (204 hp)<sup>1</sup>, 400 Nm of torque, acceleration from 0 to 100 km/h in 7.5 seconds, a top speed of 230 km/h and average fuel consumption of just 5.3 l/100 km.

**BMW 120d.** As well as its smooth-running character, the 2.0-litre four-cylinder diesel engine in the 120d variant of the BMW 1 Series Convertible also offers high performance. With considerable torque of 350 Nm at 1,750 rpm and an output of 130 kW (177 hp)<sup>1</sup>, it accelerates the car from 0 to 100 km/h in 8.1 seconds and delivers a top speed of 222 km/h. The constant high injection pressure and BMW EfficientDynamics measures ensure extremely efficient average fuel consumption of just 5.0 l/100 km.

**BMW 118d.** Flexible, powerful and smooth running, the 118d develops 105 kW (143 hp)<sup>1</sup> of power and maximum torque of 300 Nm. This enables the BMW to accelerate from 0 to 100 km/h in 9.5 seconds and achieve a top speed of 208 km/h. This master of efficiency has an average fuel consumption of just 4.8 l/100 km.

It is a characteristic embodied by every BMW without exception: pure dynamism. The chassis provides the technical foundation for this highly emotional driving experience. A result of the perfect harmonisation of innovative components and 50:50 weight distribution, it guarantees optimum contact with the road and ideal behaviour in every situation. Every BMW chassis transmits the passion for a sporty driving experience directly from the car to the driver while at the same time offering the greatest possible safety and comfort. And, of course, BMW engineers are constantly re-inventing and refining the dynamism expected of a BMW.

## THE BEST FOUNDATION FOR SUPERB DRIVING DYNAMICS. A SUPERB CHASSIS.

The most important requirement for a sporty driving experience is the best possible roadholding. In the BMW 1 Series Convertible, weight distribution of almost 50:50 across both axles, neutral steering, high directional stability and excellent traction all play their part.

**Lightweight chassis.** The perfect match for the engine and transmission partnership in the BMW 1 Series Convertible. You'll feel it in the precision of the steering, the sporty handling, the exceptionally low vibration, the acoustic comfort and the feedback from the road. The front axle is a lightweight double-joint spring-strut construction, combining maximum rigidity with minimum weight. Together with the multi-arm rear axle and the traditional BMW rear-wheel drive set-up, this gives particularly agile handling. It is characterised by a tight turning circle, high directional stability, dynamic cornering and excellent traction in every situation.

**50:50 weight distribution.** Weight is distributed almost equally across the front and rear axles. This balance ensures the desired neutral steering. Together with the first class lightweight chassis and DSC (Dynamic Stability Control) as standard, the BMW 1 Series Convertible is perfectly equipped to push the boundaries.

**Bodyshell.** Every component in the BMW 1 Series Convertible is designed to ensure maximum safety for the occupants. The particularly rigid passenger compartment is built to offer all on board the best possible protection, while the front and rear areas have highly effective crumple zones. In the event of a collision, the bodyshell converts a large part of the impact energy into deformation. This occurs at precisely specified points, thus minimising the consequences of an accident as far as possible.

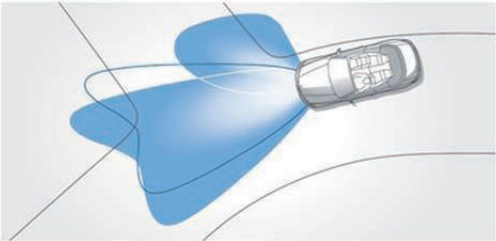

**Active Steering.** This adjusts the steering ratio and power assist according to the speed of the car (optional on 125i and 135i). On one hand, this means greater comfort when parking and enhanced agility on winding roads. On the other, it brings greater safety at motorway speeds thanks to enhanced directional stability. For example, if the vehicle tends to swerve while braking on different surfaces, Active Steering automatically corrects the situation with targeted countersteering. That means you can brake harder and the BMW 1 Series Convertible holds the road securely.

**Seven-speed Sport automatic transmission with double clutch.** This optional feature in the BMW 135i Convertible ensures the most dynamically effective transfer of engine performance to the road. It uses two sub-transmissions divided into seven gears. This enables the driver to change gear without interrupting power delivery. The gearchange process takes just milliseconds and the continuous engine connection delivers breathtaking acceleration. In automatic mode, the rapid and precise selection of the most efficient gear also significantly reduces fuel consumption. The scarcely noticeable transition between gears significantly improves driving comfort, too.

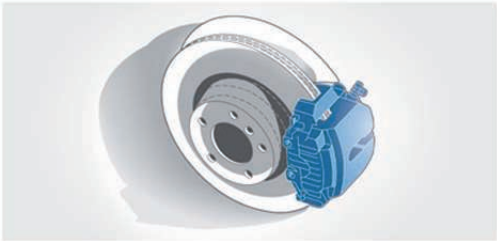

# NOT ALL ROADS PROVIDE THE BEST CONDITIONS. BUT YOUR BMW DOES.

In the BMW 1 Series Convertible, state-of-the-art technologies can be relied on at all times. Which means you enjoy superior driving characteristics in any situation.

□ **Adaptive Headlights** with variable light distribution, incl. turning lights, optimally illuminate corners as soon as the driver turns into them through electro-mechanical control of the pivoting headlamps.

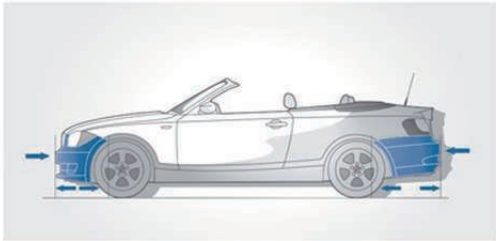

■ **Disc brakes** (special high-performance brakes on the 135i) all round are generously sized and offer maximum safety and extreme ease of use. The brake system is also characterised by high stability without affecting its short braking distances.

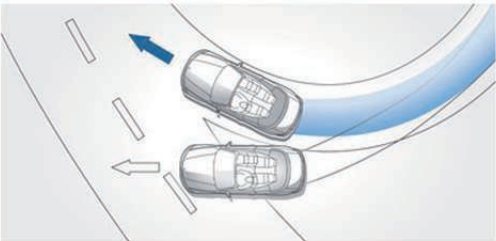

■ **BMW restraint system** for the driver and front passenger: a combination of three-point seat belt, pyrotechnical belt latch tensioner and belt force limiter ensures the best possible restraint in a collision.

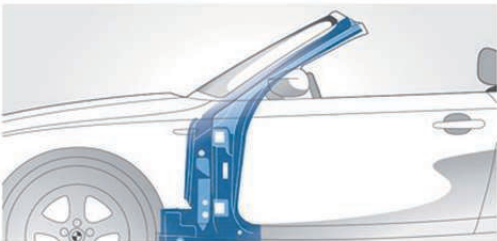

■ **Airbags:** in a BMW, all safety components are tailor-made for optimum coordination. Four airbags offer targeted protection – driver and passenger airbags, and head/thorax airbags integrated into the front seat backrests.

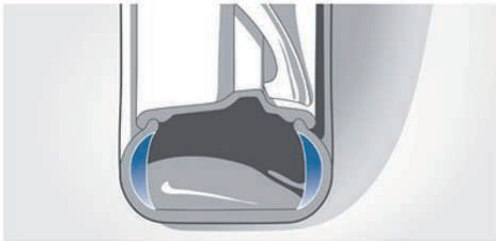

■ **Bumpers** absorb impacts of up to 4 km/h with no damage. Special deformation elements front and rear absorb impact forces up to 15 km/h.

■ **Dynamic Stability Control (DSC)**, incl. CBC and additional functions such as Brake Assistant on the 125i and 135i. DSC recognises the risk of swerving from the start and stabilises the car in milliseconds. Traction Mode (DTC) is a sub-function that allows increased wheel slip to optimise propulsive power in certain situations and enable sportier driving.

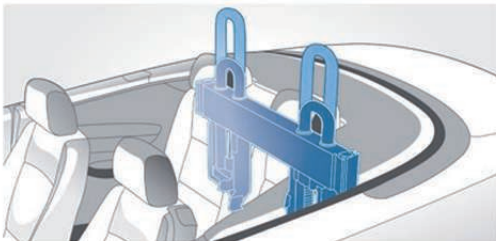

■ **Bodyshell rigidity and reinforced A-pillars.** The rigidity of the bodyshell structure is enhanced to withstand both torsion and bending with reinforcements on the undercarriage, in the sills and around the doors. Furthermore, the windscreen surround, which is strengthened in the A-pillar areas, and the cowl act as a rollover bar. All this means that the BMW 1 Series Convertible achieves stability figures equal to those of a fixed-roof car.

□ **Runflat tyres:** thanks to their reinforced sidewalls, these tyres do not fully deflate, even when air pressure is lost, and they cannot come off the wheel rim (standard from 17" light-alloy wheels and above).

■ **Runflat indicator** minimises the risks associated with tyre defects. The system detects air pressure changes in the tyres and warns the driver by activating a light.

■ **Rollover safety system** provides the greatest possible protection for the occupants in the event of an accident. If pre-defined limits for vehicle angle, longitudinal or transverse acceleration are exceeded, or if contact with the ground is lost, sensors trigger the rollover bars integrated behind the rear head-restraints, which pop up in a fraction of a second.

## BMW ConnectedDrive

In touch with your world.

Our world is becoming more connected every day. For BMW drivers, it has become the norm to communicate with the wider world from the comfort of their vehicles – they can request information, telephone or send email from the car and generally keep up to date. The BMW ConnectedDrive concept encompasses all the services and innovative technologies that network BMW vehicles and their passengers with the world outside and the surrounding traffic. BMW ConnectedDrive innovations provide greater convenience, safety and infotainment.

**Enhanced mobile networking.** The BMW Vision ConnectedDrive is a visionary Roadster with a design that amazes at first sight. Its dynamic, flowing lines draw the eye from the distinctive front end, over the long bonnet and then to an extraordinary synthesis of exterior and interior. Three levels in the interior each symbolise an area of BMW ConnectedDrive – Convenience, Infotainment and Safety. Accompanying functions and controls are highlighted with different coloured lights that illuminate information. More information on this concept vehicle and further research projects can be found in the new Future Lab.

➤ [www.bmw.com/futurelab](http://www.bmw.com/futurelab)

## BMW CONNECTED DRIVE\* – FOR MORE CONVENIENCE, INFOTAINMENT AND SAFETY.

Make the connection with BMW ConnectedDrive, wherever your journey takes you. Its innovative functions ensure optimum networking of driver, vehicle and the outside world as desired – any time and anywhere. See below for selected highlights relating to convenience, infotainment and safety. For a complete overview of the BMW ConnectedDrive range, please visit [www.bmw.com/ConnectedDrive](http://www.bmw.com/ConnectedDrive)

**Convenience.** These BMW ConnectedDrive innovations make life easier than ever – so you can concentrate on driving pleasure to the full in the new BMW 1 Series Convertible.

### Comfort Access, including exterior door handle illumination.

This system allows you to unlock, lock and start your BMW without inserting the key. All you need is the remote control, which transmits an identification signal to the car, in your pocket. Simply touch the door handle or boot lid and the BMW unlocks or locks as required. Similarly, a touch of the Start/Stop button is all it takes to start the engine.

**Rain sensor and automatic driving light control.** These features make driving your BMW even more comfortable. The rain sensor automatically controls the wipers, while automatic driving light control switches the headlights on or off depending on ambient light conditions.

**Park Distance Control (PDC).** This allows for easy parking and manoeuvring in confined spaces. Acoustic signals and a visual indicator in the Control Display tell you when the front or rear of the vehicle is approaching an object. Distances are measured by ultrasound sensors in the bumpers.

➤ [www.bmw.com/1seriesconvertible/connectivity](http://www.bmw.com/1seriesconvertible/connectivity)  
➤ [www.bmw.com/ConnectedDrive](http://www.bmw.com/ConnectedDrive)

\* May not be available in all countries. Please consult your BMW partner.

**Infotainment.** The infotainment package encompasses services with a technological or media orientation, providing drivers with the same level of information and entertainment that they would find at home or in the office.

**BMW Connected App.** For the first time, you can now use apps in your BMW. With the Apps option, an iPhone and the free BMW Connected App from the Apple App Store, you're no longer limited to just listening to local radio, your calendar is with you all the time and you're always in contact with your friends. Using the iDrive system, you can easily select web radio stations from around the world. You can also call up the latest status reports from your Facebook or Twitter accounts and view upcoming appointments on the Control Display, or even have them read to you through the audio system's speakers. And that's just the beginning, more functions and apps will follow in the future.

**USB/audio interface with extended functions.** In combination with the optional USB/audio interface and the original iPod USB cable, your BMW is able to display the album cover for the currently played title in the Control Display. This "Cover Art" display adds the cover for any song and album, for fast and convenient reference (function also available for other music devices). The USB/audio interface also makes it easy to update a part of the vehicle software in your BMW via a USB stick. This provides access to the complete range of functions supported by new mobile phone and music player models.<sup>1</sup>

**Plugin.** With your iPhone and the Apps option you are always up to date – and, naturally, also in your BMW. Through Plugin, you have direct and easy access to all menu items, you can use advanced functions such as the playback of Genius mixes and display album covers. And whenever you add iPod updates to your iPhone, they can be used in your car immediately via BMW ConnectedDrive. Thanks to this interface technology, the use of mobile devices in cars is innovative, more convenient and safer.

**Internet preparation.** Whether you need to check the balance in your bank account, place a bid on eBay or look something up in Wikipedia, the BMW ConnectedDrive Internet option ensures that you can do whatever you need to do online. To enable you to surf to your heart's content, the iDrive Controller in the centre console doubles as a computer mouse.

<sup>1</sup> For information on software updates, see [www.bmw.com/update](http://www.bmw.com/update)

**Safety.** These BMW ConnectedDrive safety technologies – including the BMW high-beam assistant – make a significant contribution to reducing the risk that road traffic can pose to BMW drivers and their passengers.

**High-beam assistant.** Avoid dazzling other road users – the optional high-beam assistant detects sources of light in the vehicle's vicinity and switches between high and low beam as traffic allows. When the system is active, an image sensor behind the rear-view mirror monitors traffic and light conditions. The assistant function then uses these sensor images to decide whether or not the high-beam lights can be switched on. The high-beam is switched to low any time traffic is detected ahead or behind, and when ambient light is sufficient.

# OPEN-TOP PLEASURE.

A quiet and secure roof makes the BMW 1 Series Convertible a comfortable car all year round. And thanks to its rapid automatic action, you won't miss a single break in the clouds and enjoy every ray of sunshine.

## OPEN TOP DRIVING IN ALL WEATHERS.

Convertible Mode of the BMW 1 Series Convertible's automatic air conditioning always guarantees a comfortable, feel-good atmosphere, even during open-top motoring.

## FREEDOM AT THE TOUCH OF A BUTTON.

Opening and closing the roof is fully automatic, even when the car is moving at speeds of up to 50 km/h.

Convertibles were built for the sun. That's why, when you do want to soak up the rays and enjoy the blue skies in the BMW 1 Series Convertible, you have to wait just 19 seconds. This is how long it takes for the soft top to disappear automatically and completely into the boot, at the touch of a button. What's more, that still leaves a generous 260 litres of luggage space. When the roof is closed, this increases to 305 litres. You can even open or close the roof when the car is moving at up to 50 km/h (the opening process must be started below 40 km/h).

An optional wind deflector enhances comfort for the driver and passenger from draughts and turbulence around the shoulders and neck. As an option, automatic air conditioning with Convertible Mode raises the feel-good atmosphere of open-top driving even more. Its sensors not only register the temperature inside the car, but also that of the exterior, the intensity of the sun and speed of travel. The system then sets the car's temperature accordingly, even providing separate settings for the driver and passenger. The

BMW 1 Series Convertible looks after the wellbeing of its passengers at a standstill, too. The optional leather seats are fitted with exclusive SunReflective technology. Special colour pigments in the surface of the leather reflect infrared radiation from sunlight, so the seats absorb up to 20 degrees less heat. When the sun disappears, the multi-layered roof can be closed again in just 20 seconds. The soft top, with an exceptional strength of 1,260 g/m<sup>2</sup>, protects the convertible's occupants from noise, wind and cold with

exemplary efficiency. And when it really cools down, the car's heated, scratch-resistant rear screen provides clear rearward visibility. The BMW 1 Series Convertible can also make a stunning impression with the roof closed: opalescent metallic fibres woven into the fabric give the Anthracite-coloured soft top a unique silvery effect.

## Exclusive Edition.

**The more individual and stylish the appearance, the more attention it gets.** It also immediately confirms your good taste – just like the new Exclusive Edition BMW 1 Series Convertible. The Chrome Line exterior detailing with its exclusive design elements combines elegantly with features such as the wing mirror covers in matt Oxide Silver and the double kidney grille with chrome-plated vertical bars. Then there's the distinctive Mineral Grey metallic paint finish option, along with five other vibrant colours. The optional 18" light-alloy wheels V-spoke 217 (standard on 135i) with mixed tyres and the chrome-finished tailpipe trims<sup>1</sup> also make a striking impression. It all underscores the unmistakable character of these Exclusive Edition models. And you're sure to get plenty of admiring looks.

**Special details can turn any space into an experience.** In the new Exclusive Edition BMW 1 Series, these details are everywhere. Take, for instance, the leather sport steering wheel or the chrome-plated sill trims with the BMW Edition inscription. There are also high-grade materials such as the new Boston leather upholstery in Pearl Grey with the distinctive grey contrasting seams. And thanks to SunReflective technology, all the seats in the BMW 1 Series Convertible stay pleasantly cool, even in strong sunlight. Floor mats with pearl grey piping, the grip on the handbrake lever with its decorative chrome finish and the optional fine-wood interior trim in Finesline anthracite complete a decidedly exclusive picture.

□ **Multifunction sport leather steering wheel** (diameter 369 mm), chrome trim, three spokes, including multifunction buttons for control of audio functions and optional telephone.

□ **18" light-alloy wheels V-spoke 217** with mixed, runflat tyres, 7.5 J x 18 with 215/40 R 18 tyres at the front, 8.5 J x 18 with 245/35 R 18 tyres at the rear (standard on 135i).

<sup>1</sup> BMW 135i and 123d with black chrome tailpipe finish.

## Sport Edition.

**Life in the city goes at its own rapid speed.** Speed you can always keep pace with in the new BMW 1 Series Convertible Sport Edition – and with as much dynamism as you wish. Even by itself, the combination of the exclusive Carbon Black metallic paint finish option, or any of the five other colours, and the optional new 18" M light-alloy wheels Double-spoke 313 M (standard on 135i) with mixed tyres is enough to make a powerful impression. The M Sport package, together with the black wing mirror covers, and the polished black vertical bars in the kidney grille, enhances the athletic appearance. The BMW Individual high-gloss Shadow Line finish, the Blackline tail lights and the chrome tailpipes<sup>1</sup> further underline the sporty character.

□ **18" M light-alloy wheels Double-spoke 208 M** with mixed runflat tyres, 7.5 J x 18 with 215/40 R 18 tyres at the front, 8.5 J x 18 with 245/35 R 18 tyres at the rear (exclusive to 135i).

□ **18" M light-alloy wheels 313 M** with mixed runflat tyres, 7.5 J x 18 with 215/40 R 18 tyres at the front, 8.5 J x 18 with 245/35 R 18 tyres at the rear (standard on 135i).

**Every metropolis exerts a powerful force of attraction.** The BMW 1 Series Convertible Sport Edition perfectly fits the picture. This car demonstrates its individual expressiveness through a host of sporting interior features, including the M leather steering wheel and the Glacier Silver aluminium trim. Additionally, stainless steel pedal covers and the M aluminium footrest integrate perfectly with the elegant Cloth-Sensatec Flashpoint upholstery combination with its blue contrasting seams, also found in the optional Boston Black leather. The sill trims with their chrome-plated BMW Edition inscription further accentuate the exceptional overall standard. Taken together, these details make one thing immediately clear: this model sets the standard when it comes to sporting style.

## Strong Acceleration. Strong Expression.

From the very first sight of the powerful-looking standard M Aerodynamic package, the BMW 135i Convertible clearly shows its capabilities.

It looks athletic from bonnet to boot: beneath the characteristic chromed double kidney grille, the central air intake draws the eye. The two air intakes at the sides are used to cool the brakes and give the front end a particularly sporty look. The two side flaps emphasise the width of the car's front profile. The modified M Aerodynamics package also includes side sills and an aggressively styled rear apron with integrated diffuser. Standard equipment includes the M Sport chassis with specific adjustment as well as the sport accelerator pedal control map. In addition, the 135i has sport seats and interior trims in Black, high-gloss, as well as 18" light-alloy Star-spoke 264 wheels with mixed runflat tyres (18" light-alloy V-spoke 372 wheels shown below.)

■ **Gearshift paddles on the sport leather steering wheel** (available for the 135i in conjunction with the optional seven-speed Sport automatic transmission with double clutch and for the 120, 125i and 120d, 123d in conjunction with the six-speed Sport automatic transmission) allows rapid manual gear changes without the need to operate the clutch (shown here with optional steering wheel inserts in Alpine White). The instrument panel on the 135i has a special scale and an extended display area.

■ **Sport seats for driver and passenger:** the higher seat sides and the electric backrest width adjustment provide optimum support in every driving situation. There is also manual adjustment for seat height, backrest angle, seat length and seat angle, as well as thigh support.

□ **Interior trim Alpine White** includes the decorative trim on the instrument panel, the interior door pull handles, centre console and the trim on the sport leather steering wheel. Other areas, such as the door opening handles, Start/Stop button and the scale ring surrounds on the instrument cluster, are in Pearlescent Chrome.

■ **High-performance brakes,** painted and with BMW lettering: with 17" inner-vented brake discs front and rear. Short braking distances and maximum stability guaranteed.

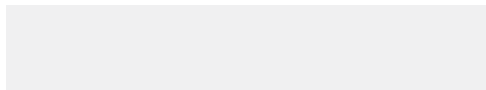

■ **Twin tailpipes:** the black, chromed twin tailpipes are standard on the 135i.

## Exterior colours.

The following pages show the colours and materials available for the BMW 1 Series Convertible. Use them to identify your favourite colours, or compare various combinations. These colour samples are meant to give you a first impression of paints and materials. Experience has shown, however, that printed versions of

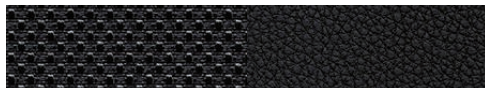

paint, upholstery and interior trims cannot in all cases faithfully reproduce the appearance of the originals. We therefore recommend that you consult your BMW partner on your preferred colour choices. They will be happy to show you samples and assist you with any special requests.

<sup>9</sup> Not available in conjunction with Exclusive Edition.

## Standard/Optional equipment.

□ **Xenon headlights for high and low beam**, incl. daytime running lights and white front accent lights, headlight washing function plus four light rings and automatic headlight range control. For significantly better illumination of the road at night and in poor weather or light conditions.

□ **Adaptive headlights** with variable light distribution, incl. turning lights, only in conjunction with Xenon headlights. Optimally illuminate corners through electro-mechanical control of the pivoting headlamps as soon as the driver turns into them.

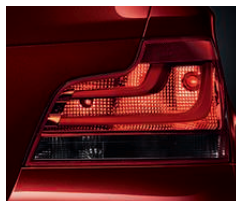

□ **LED rear lights**: two individual high-performance LED lights emphasise the sporty character of the rear (in conjunction with Xenon lights).

■ **Air Curtain**: narrow openings in the left and right edges of the front apron direct incoming air into two enclosed channels. These lead to the wheel wells, where the air exits at high speed and creates a kind of curtain alongside the front wheels. This effectively limits turbulence around the wheels and wheel wells, helping to reduce fuel consumption (not available on the 135i).

■ **Halogen lights for high and low beam** with freeform technology dual round headlamps.

■ **Innovative rear light design** ensures the car is clearly visible at night or in bad weather.

□ **Rain sensor**, incl. automatic driving lights. Once activated, the rain sensor automatically turns on the windscreen wipers according to the intensity of the rain and independently controls the wiper interval.

□ **Lights package, incl. vicinity lights in the door handles** which illuminate the area around the doors for 20 seconds when the doors are unlocked for safe access in the dark. Also: front and rear reading lights, front footwell illumination, vanity mirror lights for driver and passenger and ambient lighting.

□ **Wind deflector** for enjoyable open driving without draughts and turbulence around the shoulders and neck. Easy to use, it folds and can be stowed neatly in the luggage compartment.

■ **Roof** with multi-layered lining blends in with the lines of the Convertible (shown here in optional Anthracite with Silver effect). The interior is effectively insulated from noise and extreme temperatures.

■ **Rear window** in scratch- and dirt-resistant glass and heated, it guarantees excellent rear visibility at all times.

□ **Chrome Line exterior** includes chrome surrounds of the A-pillars, the window recess covers, the roof flap and seatbelt buckles, chrome inserts on the door sills and all three mirrors and mirror frames in Black, high-gloss (standard for 125i, 135i and 123d).

□ **High-gloss Shadow Line**, includes the surrounds of the A-pillar, window recess covers and the roof flap as well as the mirror triangle and mirror frame in Black, high-gloss.

■ **Door sill finishers** with BMW lettering and polished chrome insert (only for 125i, 135i and 123d).

■ **Exterior mirrors**, in body colour, electrically adjustable and aspheric on the driver's side. Heated mirrors are available for 125i, 135i and 123d models.

## Standard/Optional equipment.

□ **18" light-alloy wheels V-spoke 372** with mixed runflat tyres, 7.5 J x 18 with 215/40 R 18 tyres at the front, 8.5 J x 18 with 245/35 R 18 tyres at the rear.

■ **16" light-alloy wheels V-spoke 229<sup>1</sup>**, 6.5 J x 16 with 195/55 R 16 tyres (standard for 118i and 118d); 7 J x 16 with 205/55 R 16 tyres (optional for 120i and 120d), available as a complete winter wheel-and-tyre set in the Original BMW Accessories range\* (only for 120i, 118d and 120d)

□ **16" light-alloy wheels Double-spoke 222<sup>1</sup>**, 7 J x 16 with 205/55 R 16 tyres (standard for 120i and 120d; not for 125i, 135i and 123d).

□ **16" light-alloy wheels V-spoke 360<sup>1</sup>**, 7 J x 16 with 205/55 R 16 tyres (not for 125i, 135i and 123d).

□ **17" light-alloy wheels Streamline 370** with mixed runflat tyres, 7 J x 17 with 205/50 R 17 tyres at the front, 7.5 J x 17 with 225/45 R 17 tyres at the rear (not for 135i).

□ **17" light-alloy wheels Star-spoke 256** with runflat tyres, 7 J x 17 with 205/50 R 17 tyres (standard for 125i and 123d, not for 135i), available as a complete winter wheel-and-tyre set in the Original BMW Accessories range\* (only for 125i, 135i and 123d).

□ **17" light-alloy wheels Star-spoke 371** with runflat tyres, 7 J x 17 with 205/50 R 17 tyres (not for 135i).

□ **17" light-alloy wheels Star-spoke 262** with mixed runflat tyres, 7 J x 17 with 205/50 R 17 tyres at the front, 7.5 J x 17 with 225/45 R 17 tyres at the rear (not for 135i).

□ **18" light-alloy wheels Star-spoke 264** with mixed runflat tyres, 7.5 J x 18 with 215/40 R 18 tyres at the front, 8.5 J x 18 with 245/35 R 18 tyres at the rear (standard for 135i).

\* May not be available in all countries. Please consult your BMW partner.

<sup>1</sup> Including BMW Mobility set or optional runflat tyres.

<sup>2</sup> In conjunction with Alpine White interior trim; Alpine White trim bars.

□ **Seven-speed Sport automatic transmission with double clutch and gear shift paddles on the steering wheel** for particularly rapid gearshifts without interrupting power delivery. Provides superb driving dynamics and efficient fuel consumption (available for 135i).

■ **Six-speed manual transmission** (shown here with smoker's package) allows a very sporty driving style with its smooth and precise short-throw action. Closely spaced gear ratios and the addition of a sixth gear enable the driver to make even more individual use of the engine's characteristics.

□ **Six-speed automatic transmission Steptronic** (shown here with non-smoker package) with Adaptive Transmission Management. Allows for very fast, precise gearshifts for maximum dynamic performance (not for 135i).

■ **Standard steering wheel** (diameter 375 mm), three-spoke.

□ **Multifunction sport leather steering wheel** (diameter 369 mm), chrome trim<sup>2</sup>, three spokes, including multifunction buttons for control of audio functions and optional telephone (standard for 125i, 135i and 123d).

□ **Steering wheel heating** for sport leather multifunction steering wheel (not in conjunction with Alpine White interior trim).

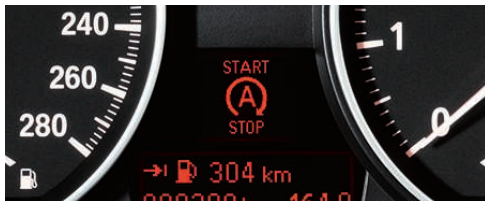

□ **Multifunction sport leather steering wheel with gearshift paddles** (diameter 369 mm), chrome trim<sup>2</sup>, three spokes, including multifunction buttons for control of audio functions and optional telephone.

□ **Multifunction M leather steering wheel** (diameter 369 mm), three-spoke, including multifunction buttons for remote control of radio and telephone. If you opt for the manual transmission, the gearshift carries the M logo.

## Standard/Optional equipment.

■ **Auto Start/Stop display** signals on the Info Display when the engine has been switched off by the Auto Start/Stop function (for instance, at traffic lights or in a jam). When the clutch is used again, the engine is re-started automatically and the display turns off (for 118i, 120i, 118d, 120d and 123d only in conjunction with six-speed manual transmission).

■ **Optimum Shift Indicator** lets you know when it is more economical to drive in another gear. The system indicates when to shift up or down and adapts these recommendations to your driving style. When accelerating, for example, a gearshift is suggested when progress can be maintained in a higher gear for lower fuel consumption (for models with six-speed manual transmission).

□ **Storage package** includes cupholder, storage nets on the front seat backrests, 12-V sockets, two lashing eyes in the luggage compartment, storage nets (right), two tensioning straps on the luggage compartment floor and a storage compartment on the instrument panel. (Not in conjunction with navigation.)

□ **Cruise control** stores and maintains your desired speed, from approx. 30 km/h (controlled by the left-hand steering column stalk). After acceleration, the vehicle automatically reaches the stored speed.

■ **Instrument panel** with analogue instruments and red illumination for speed and rev counter, as well as an on-board computer with LCD display showing vehicle and trip mileage.

□ **Park Distance Control (PDC)**, front and rear, facilitates parking and manoeuvring in confined spaces, giving an acoustic signal to indicate the distance between your car and an obstacle. In conjunction with an optionally available navigation system, the distance is also shown visually.

□ **Navigation Business**, incl. Radio Professional with CD drive, iDrive Controller with direct menu control buttons, eight functional bookmarks, fixed high-resolution 6.5" display, maps or combined arrow/map display, USB-audio interface and voice control system.

□ **Navigation Professional**, incl. Radio Professional with DVD drive, iDrive Controller with direct menu control buttons, eight functional bookmarks, integrated hard disk for maps and audio files, fixed high-resolution 8.8" graphic display, 3D map display, bird's eye view, Real-Time Traffic Information (RTTI), USB-audio interface and voice control system.

\* May not be available in all countries. Please consult your BMW partner.

<sup>1</sup> 8.8" colour display of the Navigation system Professional shown here.

<sup>2</sup> For information on recommended devices please go to [www.bmw.de/bluetooth](http://www.bmw.de/bluetooth)

<sup>3</sup> The snap-in adapter shown here may be different from the actual product.

<sup>4</sup> Navigation, navigation packages, hands-free and mobile phone preparation included.

■ **AUX-IN connection**, incl. 12-V socket for an external audio source such as an MP3 player.

□ **USB/audio interface<sup>4</sup>** for connection of a USB stick or MP3 player. In conjunction with a navigation system, this feature includes Cover Art display in the Control Display. The system is operated using buttons on the optional multifunction steering wheel, Radio Professional or the iDrive Controller with direct menu control buttons. Optional armrest comes with a multimedia bag.

■ **Radio Business CD**, with FM and MW, six station buttons, CD player, MP3 decoder and five loudspeakers.

□ **Radio Professional**, features as above, plus enhanced two-line display of information such as CD and MP3 titles.

□ **Harman Kardon Sound system** with powerful amplifier, equalizer, centre speaker and 10 loudspeakers for superb sound.

□ **Internet preparation<sup>\*1</sup>**: for the very first time, BMW ConnectedDrive provides unlimited internet access using the SIM card in the car. You can type the address for any web page or gain access directly using a Favourites list. The iDrive Controller in the centre console acts as a computer mouse.

■ **Roof button** for fully automatic opening and closing of the convertible roof. The opening process can be started at speeds of up to 40 km/h and continued up to 50 km/h.

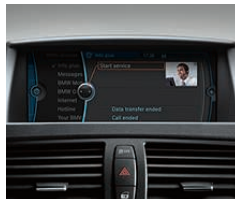

□ **Mobile phone preparation with USB interface<sup>2,3</sup>** incl. hands-free system, connection for recharging and external aerial. Featured as part of navigation packages.

□ **Hands-free system with USB interface<sup>2</sup>** enables wireless connection of a Bluetooth-compatible mobile phone.

□ **CD-changer**, in the luggage compartment on the left, for up to six CDs.

□ **BMW Assist<sup>\*2</sup>** helps the driver by making automatic and manual emergency calls and giving precise, to-the-metre position data. Also features Real-Time Traffic Information (RTTI), Google Send to Car and a personal information service.

□ **Automatic air conditioning** (shown here), incl. Automatic Air Recirculation, microfilter, fogging and solar sensors and ALL button, quickly creates and maintains the desired temperature. Separate temperature controls on left and right sides.

## Standard/Optional equipment.

□ **Sport seats** for driver and front passenger (shown here with the optional Boston leather Savannah Beige) provide optimum lateral support with seamless electric seat backrest width adjustment. Manual adjustment of fore-and-aft position, seat height, backrest angle, seat angle and thigh support. (Standard for 135i).

■ **Rear seats**, ergonomically formed and each with three-point seat belt as standard.

■ **Standard seats** (shown here with optional Boston leather Black) with manual seat and height adjustment for driver and front passenger seat.

□ **Cupholder**, detachable, incl. positioning in the centre console.

□ **Seat heating** for driver and front passenger (with three levels, shown here with air conditioning). Seat surface and backrest, including side supports, can all be heated and deliver warmth soon after you pull away.

□ **Lumbar support** for driver and front passenger seats, electrically adjustable in height and depth, for an ergonomically perfect seat position and support of the back muscles.

□ **Seat adjustment** for driver and front passenger with electric seat height and backrest adjustment, as well as fore/aft and seat angle adjustment. Memory function for driver's seat and exterior mirrors (incl. parking function).

□ **Through-loading** function with integrated transport bag allows you to make the best possible use of the luggage compartment. Even large items can be transported easily. The removable backrest parts can be stored securely.

□ **Transport bag**, enables the clean and safe transport of bulky items such as a pair of snowboards. When the transport bag is no longer needed, it stows away out of sight to save space (included with the optional through-loading function).

□ **Interior mirror**, with large mirror area. When light from vehicles behind reaches a given intensity, the mirror automatically dims.

■ **Luggage compartment** with full fabric lining and lights. An elastic strap (left) and lashing eyes (on the inside of the tailgate) allow items to be transported safely (shown with the optional storage package).

□ **BMW Welt**: taking delivery of a car has always ranked among the best moments for any car driver. Now that moment can become a truly unforgettable day at BMW Welt, the experience and delivery centre in Munich, Germany. Experience more online at [www.bmw-welt.com](http://www.bmw-welt.com)

■ **Personal Profile** stores your personal preferences depending on equipment for settings such as the temperature and air distribution of the automatic air conditioning, position of the driver's seat and exterior mirrors and the volume and sound of the radio. Settings are then activated, depending on the key used, when you unlock the central locking.

□ **BMW Service Inclusive\***: your BMW Partner has the perfect solution when it comes to service too. With BMW Service Inclusive, there are no extra costs for regular maintenance within the agreed period and service schedule. More information from [www.bmw.com/serviceinclusive](http://www.bmw.com/serviceinclusive)

## M Sport package. The expression of majestic dynamics.

□ The charisma of a winner: if you opt for the M Sport package, you will be sure to turn heads with the exclusive Le Mans Blue metallic exterior paint (optional). The athletic front and rear aprons, dynamic side sills and large air intakes also underline the impressive design. As well as the M Sport chassis<sup>1</sup>, the M Sport package includes suspension lowered by 15 mm and the Shadow Line trim, with key areas such as side window trims in high-gloss Black.

powered by 

In addition to the Le Mans Blue metallic paint shown, the M Sport package is available in a further five attractive colours. An extra dynamic touch: the M Sport package includes **chrome tailpipes** for every engine variant.

The **sport seats for driver and passenger** offer perfect support through any corner in the exclusive fabric/Sensatec combination Flashpoint Black.

The ergonomic **M leather steering wheel** features multifunction buttons which can be used to operate the radio, CD player and telephone (optional) while you drive. Exclusive for the M Sport package: Aluminium Glacier Silver interior trim, M gearshift with M logo (manual transmission only) and M footrests.

The **M door sill finisher** with the M logo and polished chrome insert offers a stylish welcome.

**17" M light-alloy wheels Double-spoke 207 M** with mixed runflat tyres, 7 J x17 with 205/50 R 17 tyres at the front, 7.5 J x 17 with 225/45 R 17 tyres at the rear.

□ **18" M light-alloy wheels Double-spoke 261 M** with mixed runflat tyres, 7.5 J x 18 with 215/40 R 18 tyres at the front, 8.5 J x 18 with 245/35 R 18 tyres at the rear (standard for 135i).

\* May not be available in all countries. Please consult your BMW partner.

<sup>1</sup> Also available with standard suspension.

## Original BMW Accessories\*.

**Tow hitch-mounted, lockable cycle carrier, 105 mm long Sport radio aerial, 311 star spoke chrome 18" light-alloy wheels, cast.**

**BMW Junior seat II-III**, available in two colourways.

**Printed windbreak.**

**Chrome tailpipe trim**, emphasizes the car's sporty looks.

**Travel & Comfort system**, folding table, mounts on the front seat headrest pillars.

**BMW Station**, for Apple iPhone, for connecting your iPhone to your car's audio system.

**Travel & Comfort system**, coat hanger, mounts on the front seat headrest pillars.

Driving a BMW is always a special experience, but it can be made even more so with Original BMW Accessories thanks to their combination of unique ideas, supreme functionality and stunning design. Discover a wide range of innovative solutions, covering areas including the exterior and interior, communication and information, as well as transportation and luggage compartment solutions. For more information, please contact your BMW Service partner who will be pleased to advise you on the full range of Original BMW Accessories and also provide an Accessories catalogue. Or visit

	W	2520	2520	2520	2520	2520	2520	2520

All dimensions of the technical drawings in millimetres. Luggage compartment volume approx. 260-305 litres.

<sup>1</sup> Figures quoted include a 90% tank filling, 68 kg for the driver and 7 kg for luggage. Unladen weight applies to vehicles with standard specification. Optional equipment may increase these figures.

<sup>2</sup> The actual total weight of the trailer may not exceed the maximum permitted trailer load plus maximum permitted towbar download.

<sup>3</sup> BMW recommends the use of RON 95 super unleaded petrol. Unleaded RON 91 and higher with a maximum ethanol content of 10% (E10) may also be used. Output and consumption figures apply to RON 98 fuel (135i minimum RON 95).

<sup>4</sup> All engines comply with the EU6 emissions standard. Fuel consumption is determined in accordance with the ECE driving cycle (93/116/EC). This is made up of approximately one third urban and two thirds extra-urban driving (based on the distance covered). CO<sub>2</sub> emissions are measured in addition to fuel consumption. Optional equipment may increase these values. For more information on fuel consumption and CO<sub>2</sub> emissions, please see your BMW partner.

<sup>5</sup> Electronically limited.

<sup>6</sup> Track width 125i, 135i and 123d front 1474 mm and rear 1507 mm, 120i and 120d front 1480 mm and rear 1513 mm

Values in [ ] apply to vehicles with six-speed automatic transmission Steptronic or seven-speed Sport automatic transmission with double-clutch (135i).

**The BMW Service concept: always up to speed.** When you buy a BMW, you can look forward to superb service and comprehensive customer care, with a worldwide network of more than 3,300 BMW Service partners in more than 150 countries ready to assist you at any time. The vehicle's on-board diagnostics keep you informed of when the car is next due for a check-up and what work needs to be done: **Condition-Based Service (CBS)** tracks service fluids and the condition of essential parts subject to wear. It also monitors the time- and mileage-linked service requirements of your BMW. Using these measurement data, the Info Display in the cockpit automatically alerts you in advance whenever

any part of the vehicle requires servicing. The iDrive Control Display contains exact information on which vehicle components will need to be serviced and when. In conjunction with BMW TeleServices\*, the innovative telematics service provided by BMW Service, the CBS data are automatically transmitted to your BMW Service partner. This means that your service consultant has more time for you, and can provide more comprehensive advice. Your BMW Service partner will of course have **Original BMW Parts** available for any work to be done. In short: quality and safety are our top priorities.

## TAILOR-MADE FOR YOUR VEHICLE. BMW SERVICE.

**BMW Service Inclusive\*.** Service costs are another area where your BMW Service partner can offer you an intelligent solution. With BMW Service Inclusive, routine maintenance service will be provided at no extra cost to you, for the agreed duration or mileage. Find out more online at

[www.bmw.com/serviceinclusive](http://www.bmw.com/serviceinclusive)

With **BMW TeleServices\***, you are always in safe hands. This feature enables your BMW to contact your BMW Service partner and register itself for a service appointment. As soon as the CBS sensors detect a service requirement, the vehicle will initiate an automatic BMW Teleservice call and transmit all service-related data – data which previously had to be collected in the workshop. Your service consultant will then call you back, in order to arrange an appointment. As vehicle information is transferred in advance, time in the garage can be spent more efficiently, so your BMW is back on the road faster. In the unlikely event of a breakdown, BMW TeleServices enables you to transmit diagnostics, vehicle and location data directly to BMW breakdown assistance. With BMW Teleservice Assistance, malfunctions can often be remedied remotely, getting you quickly and easily back on the road. For further information, visit

[www.bmw.com/teleservices](http://www.bmw.com/teleservices)

**Mobile Service\*:** in the event of a breakdown, BMW Mobile Service is at your disposal round the clock. Specially trained BMW technicians will do everything necessary to get your BMW back on the road, with telephone or on-site assistance as needed. Simply contact BMW Mobile Service. In addition, all BMW vehicles newly registered from 1 January 2011, have a comprehensive 24-month mobility service in line with the applicable BMW Mobile Care warranty conditions (including towing, rental car, taxi, hotel accommodation and vehicle return). This BMW mobility warranty is automatically extended by another 24 months if you have the scheduled engine oil service performed by your authorised BMW Service partner – for up to 5 years after initial vehicle registration. More detailed information is available from your BMW Service partner or online at

[www.bmw.com/mobileservice](http://www.bmw.com/mobileservice)

**BMW Financial Services.** If there's one more thing you could wish for to go with your BMW, it could simply be the perfect financing solution – one that leaves you with enough room for the other good things in life. BMW Financial Services provides you with personalised leasing, finance and insurance options – tailored to your requirements and budget. But we offer you more than just favourable conditions. Take for example the components of our leasing package, which include courtesy vehicles and insurance. For further information please visit [www.bmwfs.com](http://www.bmwfs.com). Find out more – your BMW partner will be pleased to make you an individual offer for your desired car.

\* May not be available in all countries.  
Please consult your BMW partner.

## SHAPING THE FUTURE – RESPONSIBLY.

The BMW Group has been ranked the most sustainable automotive company worldwide in the Dow Jones Sustainability Index for the seventh time in a row, because sustainability is an integral part of our value chain – it encompasses every stage from the development of fuel-saving and alternative vehicle concepts to environmentally friendly production processes and recycling. Our research and development philosophy BMW EfficientDynamics delivers tangible benefits to customers, our climate and the environment. Since 1995,

## EXPERIENCE MORE WITH BMW.

**BMW Magazine: information and entertainment.** Competent and comprehensive, the BMW Magazine brings you all the latest news from the world of BMW. You will receive two issues per year free of charge when you purchase a new BMW.

**BMW Driving Experience:** "Learn how to enhance your driving pleasure." Driving a BMW should be fun. And like any other piece of sport equipment, the better you are able to control it, the more fun it is. The BMW Driving Experience teaches you – on road and off, in snow and ice, or even in the Namibian desert – how far you can push your BMW, while still remaining perfectly safe. Topics range from BMW Safety and Snow and Ice to M Race Track Training on one of the toughest race tracks in the world – the Nürburgring. More information is available at

[www.bmw-drivingexperience.com](http://www.bmw-drivingexperience.com)

**BMW Welt: joy has a home.** Visit Munich, home to the BMW brand for over 90 years, and pick up your new BMW at BMW Welt. There you'll be able to experience BMW with all five senses and see your new BMW for the first time with your own eyes. BMW Welt offers you a tailor-made visitor programme. From relaxing in the Premium Lounge to a factory tour or a visit to the BMW Museum – there are plenty of unique experiences to perfectly complement the hand-over of your new car. It's more than worth it. Visit us online today at [www.bmw-welt.com](http://www.bmw-welt.com). Your local BMW partner can also provide you with further information. We look forward to seeing you.

**BMW TV:** your source for all things BMW. This is where you can get to know the brand in all its facets, through comprehensive features, portraits, and background reports.

**[www.bmw.tv/com](http://www.bmw.tv/com)** provides you with up-to-date and entertaining information on automobiles, innovations, motor shows, events, sports, and lifestyle topics.

for example, our European new-vehicle fleet's CO<sub>2</sub> emissions have dropped by around 30%.

But we are still aiming for more: over the period from 2006 to 2012, we aim to reduce the amount of resources – such as water and energy – consumed by our vehicle manufacturing operations by 30% per vehicle. In our engine plant in Steyr, Austria, we are already one step further: since 2007, production there has generated no waste water at all.

And of course each of our vehicles is designed for easy and economical recycling after its long running life. Please contact your BMW partner on all matters regarding your end-of-life vehicle. Further information on this topic is also available on our website.
