	Equipment of model shown:
BMW Z4 sDrive35i	Engine: BMW TwinPower Turbo six-cylinder in-line petrol engine
	Max. output: 225 kW (306 hp)
	Wheels: 18" light alloy wheels multi-spoke 293 with mixed tyres
	Exterior colour: Deep Sea Blue metallic Interior: Kansas leather, extended, Canberra Beige
Further information on fuel consumption and CO ₂ emissions can be found on page 63.	

**THE ROADSTER IS A DREAM
THAT WE HAVE TURNED INTO REALITY.**

"BMW" and "roadster" – two words that are music to the ears of any automobile enthusiast. Together they always sound a chord of driving pleasure in its purest form. And in continuation of this tradition we are proud to present the BMW Z4. Classic roadster characteristics – the long bonnet, short overhangs and deep, way-back seat – in a modern idiom create a look that is as familiar as it is unique. A look that is complemented to perfection by the retractable hardtop. Whether open or closed, this folding roof maintains the low-slung lines typical of a roadster. With it you can savour one of the finest ways to drive in comfort.

**IF ONLY ALL FIRST IMPRESSIONS
LASTED THIS LONG.**

The broad, flat front end, exuding roadster flair, conveys at a glance the kind of ride the BMW Z4 can deliver. The sculptured bonnet is dominated by two powerful contours radiating from the BMW emblem. The finely shaped dual round headlights with Xenon technology for high and low beam draw the eye whether off or on, while the four striking illuminated rings of the daytime running lights make the roadster unmistakable even in the dark. And the deep, upright BMW double kidney grille clearly proclaims just how much power is stored up behind them.

**THE ROAD DOESN'T HAVE TO BE GREY.
LIGHT IT UP WITH THE BMW Z4 ROADSTER.**

The BMW Z4 is as inspiring to drive as it is to look at. Our engineers set out to create a fusion of classical and innovative elements: powerful, smooth-running engines, together with the set-back seating position and the rear-wheel drive for a sensation of intense dynamism at the wheel. They're design concepts that are hard to beat, as anyone who has ever driven a BMW roadster can confirm. But our engineers have retained something else as well: their passion for developing new and pioneering technologies. This passion has produced, for example, the seven-speed sport automatic transmission with double clutch that comes as standard with the BMW Z4 sDrive35is (optional for the Z4 sDrive35i). It shifts gears lightning-fast, imperceptibly and particularly efficiently – automatically, or manually using the paddles on the leather steering wheel. Or the Driving Experience Control: at one touch, you can adjust the ride to suit your mood, from emphatically sporty to softly cushioned. For even more of a stand-out athletic performance, the BMW Z4 is also available with an adaptive M suspension (standard in the BMW Z4 sDrive35is).

ONE ROADSTER FOR ALL FOUR SEASONS.

Imagine a practical vehicle that does what you need it to do 365 days a year – where previous roadsters have struggled, the BMW Z4 effortlessly excels. The retractable aluminium hardtop means you can enjoy driving all year round. It guarantees a pleasant temperature whatever the weather, keeps noise to a comfortable level, and gives a great all-round view. For longer journeys, a range of intelligent and capacious storage features provide all the room you need. And all this culminates in a very special kind of everyday practicality that lets you leave the everyday behind.

A drive in the BMW Z4 is always a very special experience, which can be savoured to the full in the cockpit. Every element here is tightly focused on the driver, all instruments are clearly structured – there's no forgetting that you're in a BMW roadster. The four round air-conditioning controls (shown here with optional automatic air conditioning) are a fine example of an interior where every detail is imbued with style. Pleasant to the touch, their form alludes to the proud history of the BMW Roadster. And with the optionally available latest generation iDrive control system you can operate numerous on-board systems entirely intuitively, with nothing to distract you from the thrill of the BMW Z4.

The high-quality materials in the interior of the BMW Z4 Roadster are produced with loving attention to detail, creating an atmosphere of exclusivity. The optional Design Pure Balance, shown here, is particularly breathtaking. With fine-wood trim Fineline Anthracite and extended leather fittings in exclusive Merino Cohiba Brown leather, it exudes sophisticated modernity. Even the instrument panel and the door shoulders are luxuriously upholstered in Cohiba Brown leather, whose high quality is evinced by fine double seams with contrast stitching. The leather upholstery on the sport seats for driver and front passenger features innovative SunReflective Technology for even more comfortable open-top driving. The leather contains reflective colour pigments, so that the seats don't heat up as much – even when exposed to direct sunlight.

BMW EFFICIENT DYNAMICS – MAKING A LITTLE GO A LONG WAY.

BMW was one of the first manufacturers to pursue the goal of efficient drive technologies, as part of its multi-award-winning sustainability strategy. BMW EfficientDynamics, included as standard, is a comprehensive technology package designed to reduce fuel consumption and emissions – while simultaneously enhancing dynamic performance. A winner of many technology awards, it has enabled the BMW Group to reduce the CO₂ emissions of its European new-vehicle fleet by about 30% since 1995. 39 models¹ currently produce less than 140 g of CO₂ per kilometre. The BMW Group intends to achieve a further 25% reduction in CO₂ emissions by 2020.

Different paths to the same destination: unmistakable BMW driving pleasure. Under the umbrella of the BMW EfficientDynamics project, BMW is continuously developing innovative systems that will bring us closer to the long-term goal of emission-free mobility. This BMW initiative for more driving pleasure is based on several pillars:

Technology package. The optimisation of vehicles powered by conventional diesel and petrol engines continues apace. A comprehensive technology package enables the reduction of fuel consumption and emissions, while at the same time increasing power output and driving enjoyment. These advances are based on innovations such as BMW TwinPower Turbo technology, the Auto Start/Stop function, Brake Energy Regeneration, and many others.

BMW ActiveHybrid. The BMW range includes impressive hybrid models, such as the new BMW ActiveHybrid 3² and BMW ActiveHybrid 5, and the BMW ActiveHybrid 7. All of these volume models combine high efficiency with superior dynamic performance.

BMW ActiveE. Since 2011, there has been a new type of dynamism on the road: the BMW ActiveE. Powered by electricity alone, it is manufactured in a small production run, as part of a pilot project. In this way, BMW is preparing the way for the emission-free mobility of tomorrow.

BMW Hydrogen. BMW is continuing its research into alternative drive concepts for the future, such as hydrogen drive.

BMW i. In line with the BMW EfficientDynamics idea, the BMW i brand is developing visionary new vehicle concepts such as the BMW i3 (Megacity Vehicle) and the BMW i8. While including existing BMW EfficientDynamics technologies, these vehicles also use new lightweight materials such as CFRP and electric drive systems with powerful battery technology such as BMW eDrive. With a focus on sustainability across the entire value-added chain and a range of supporting mobility services, BMW i is redefining individual mobility.

For further information see www.bmw-i.com

BMW EFFICIENT DYNAMICS FEATURES IN THE BMW Z4 AT A GLANCE.

Electric Power Steering. Unlike conventional hydraulic steering systems, the electrical steering only uses energy during actual steering. When the steering wheel position is constant – for example at high speed along the motorway – the electric motor is inactive.

BMW TwinPower Turbo technology. BMW TwinPower Turbo combines the latest injection technologies for enhanced efficiency with fully variable power distribution featuring innovative turbocharging technology for a more dynamic ride.

Auto Start/Stop function. The BMW Z4 sDrive20i and Z4 sDrive28i models with six-speed manual transmission are equipped with the Auto Start/Stop function. The Auto Start/Stop function switches off the engine when the vehicle comes to a temporary standstill (e.g. at traffic lights) to further reduce overall fuel consumption. A signal (Start/Stop) in the display indicates that the function is active.

Optimum Shift Indicator. Timely gear shifts are one of the most effective and easiest ways to save fuel. This is where the Optimum Shift Indicator in conjunction with six-speed manual transmission comes in. It shows the driver which gear to use in order to save fuel.

Brake Energy Regeneration. To supply the battery with electrical energy, the generator (alternator) is driven using engine power on an ongoing basis, which requires additional fuel consumption. Brake Energy Regeneration means the generator usually only generates electricity when the driver brakes or takes their foot off the accelerator – previously unused kinetic energy is transformed in coasting mode into electrical energy before being fed into the battery. Thus electricity is generated while coasting, without consuming fuel.

Tyres with reduced rolling-resistance. While the car is in motion, the tyres are constantly changing shape, using up energy and fuel. Tyres with reduced rolling-resistance have an improved design and use special materials for their road treads and side walls, which reduces deformation.

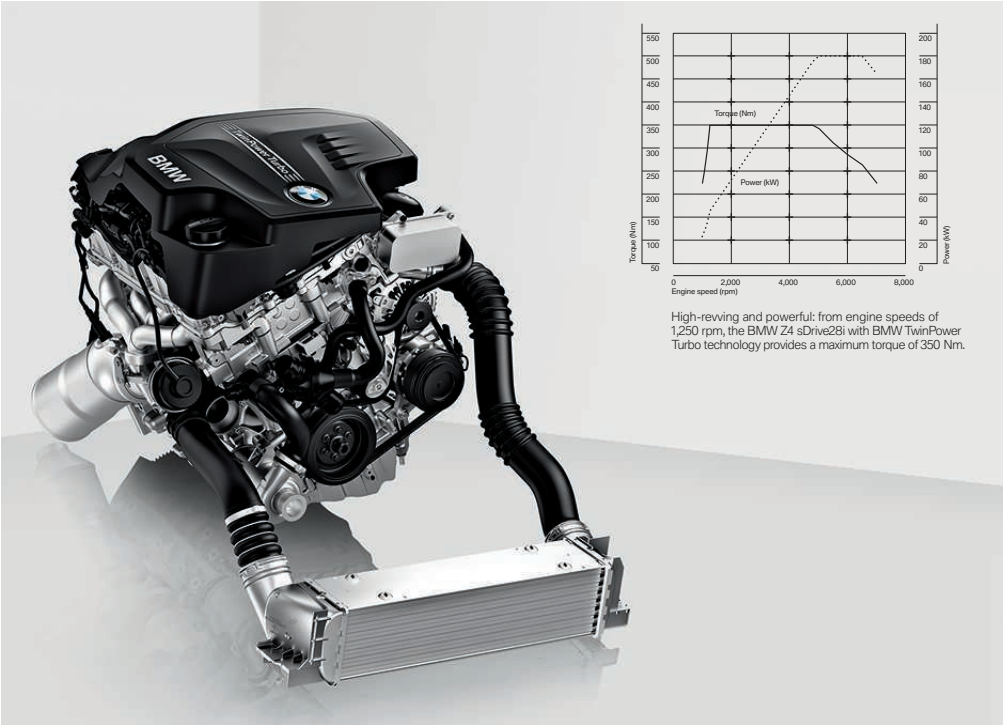

Lightweight construction. Our engineers use aluminium where lighter materials are more expedient, for instance in the front section and for the suspension, in the bonnet and the hardtop. For example, the engines are made of aluminium, making them the lightest in their class. These weight savings can lead to lower fuel consumption and better axle load distribution – for more agility, especially in bends.

Some BMW EfficientDynamics features are dependent on the car's equipment and are not available for all model variants. Your BMW partner will be happy to provide you with information on all equipment details.

¹ Status 10/2011.
² Due to become available from 09/2012.

THESE ENGINES COME UP WITH ALL THE RIGHT NUMBERS. IN ACCELERATING, FOR EXAMPLE.

The engines. Performance, powerful delivery and high revving distinguish each and every BMW engine. And of course, every engine provided for the BMW Z4 adheres to the BMW EfficientDynamics philosophy. They strive to bring performance to the road with maximum efficiency, while simultaneously reducing fuel consumption and CO₂ emissions to a minimum. Regardless of which innovative BMW TwinPower Turbo engine you opt for, you're guaranteed maximum driving pleasure combined with outstanding efficiency.

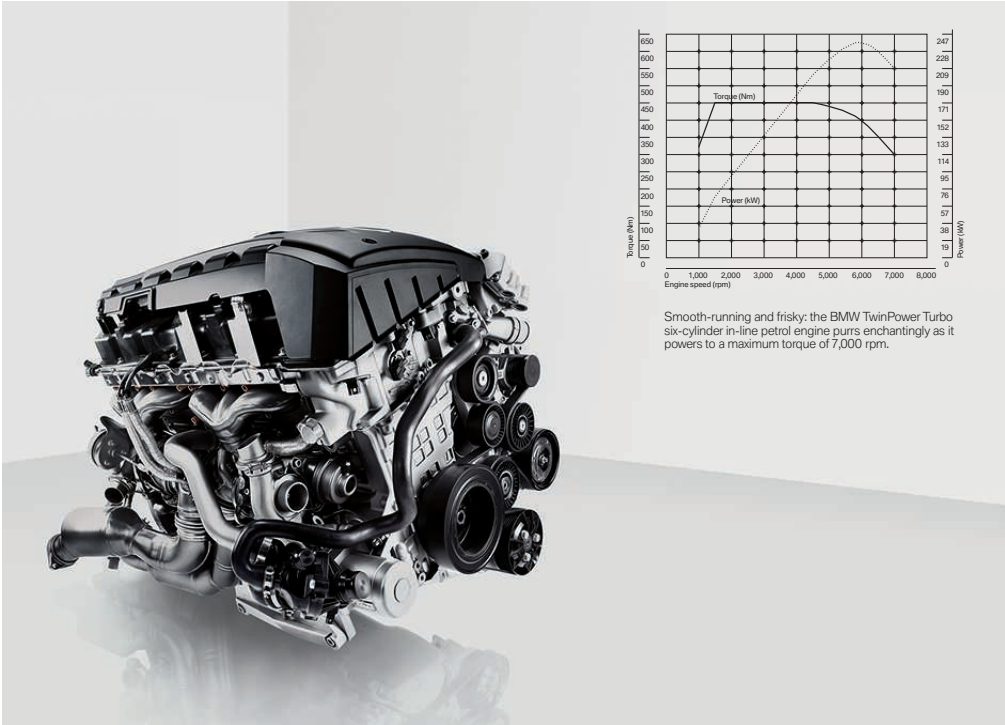

High-revving and powerful: from engine speeds of 1,250 rpm, the BMW Z4 sDrive28i with BMW TwinPower Turbo technology provides a maximum torque of 350 Nm.

BMW Z4 sDrive20i. The new BMW TwinPower Turbo four-cylinder petrol engine with High Precision Injection, Valvetronic, Double-VANOS and TwinScroll turbocharger combines a powerful engine with high efficiency. An output of 135 kW (184 hp)¹ from a two-litre capacity allows a maximum torque of 270 Nm. The BMW Roadster accelerates from 0 to 100 km/h in 6.9 seconds and has a maximum speed of 235 km/h.

www.bmw.com/z4/engines

BMW Z4 sDrive28i. Even at an extremely low engine speed of 1,250 rpm, the new BMW TwinPower Turbo 2.0 litre engine with its all-aluminium crankcase provides a maximum torque of 350 Nm. This is due to the combination of BMW TwinPower Turbo technology, High Precision Injection, Valvetronic, Double-VANOS and the TwinScroll turbocharger. The rapid response of the TwinScroll turbocharger and an output of 180 kW (245 hp)¹ enable the BMW to accelerate smoothly and effortlessly from 0 to 100 km/h in 5.7 seconds. This excellent driving performance is rounded off by a top speed of 250 km/h and efficient fuel consumption of 6.8 litres per 100 km.)

Smooth-running and frisky: the BMW TwinPower Turbo six-cylinder in-line petrol engine purrs enchantingly as it powers to a maximum torque of 7,000 rpm.

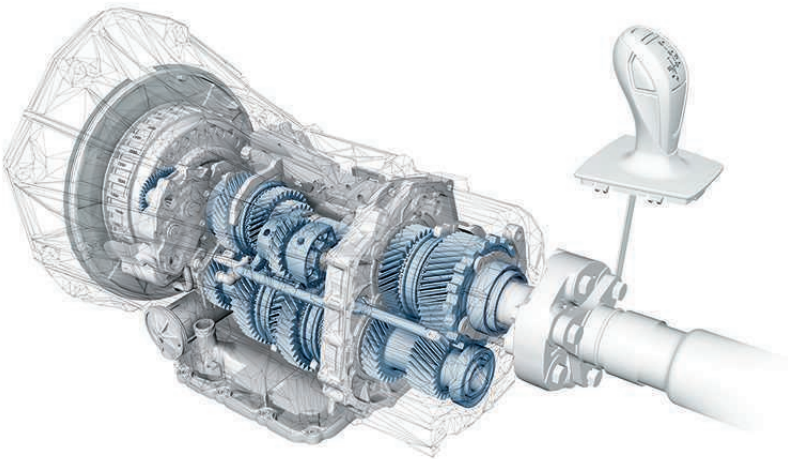

BMW Z4 sDrive35i. The BMW TwinPower Turbo six-cylinder in-line petrol engine with 3.0 litre capacity incorporates two turbochargers with Double-VANOS as well as High Precision Injection to deliver an output of 225 kW (306 hp)¹. An impressive 400 Nm of torque kicks in at only 1,300 rpm. And the revving power knows no limits: the BMW accelerates from 0 to 100 km/h in 5.2 seconds with up to 7,000 rpm – and consumes on average 9.4 litres per 100 km with a CO₂ emission output of 219 g/km.

BMW Z4 sDrive35is. The most powerful BMW TwinPower Turbo six-cylinder in-line petrol engine incorporates two turbochargers with Double-VANOS as well as High Precision Injection and produces an impressive 250 kW (340 hp)¹ from its three-litre capacity for an aggressive 450 Nm of torque. Plus a boost function allows you to quickly rev it up to as much as 500 Nm. With its standard seven-speed sport automatic transmission with double clutch, the six-cylinder in-line petrol engine rockets the Z4 without a break in torque from 0 to 100 km/h in just 4.8 seconds – and consumes on average just 9.0 litres over 100 km, with a CO₂ emission output of 210 g/km.

¹ Further information on fuel consumption and CO₂ emissions can be found on page 63.

FAST GEAR CHANGES – MADE EASY BY EVERY BMW Z4.

A stand-out athletic performance needs more than just pure power. Equally important for a dynamic and superior drive is the seamless transfer of power into acceleration. In the BMW Z4, this is made possible by cutting-edge transmission technology. The models BMW Z4 sDrive20i, Z4 sDrive28i and Z4 sDrive35i are fitted with a six-speed manual transmission as standard, which features short-throw gear shifts for particularly fast gear changes. The eight-speed sport automatic transmission, which combines outstanding efficiency with an extremely sporty driving experience, is available upon request for the BMW Z4 sDrive20i and the BMW Z4 sDrive28i. The BMW Z4 sDrive35i can also be selected with the optional seven-speed sport automatic transmission with double clutch that comes as standard with the BMW Z4 sDrive35is. So while one gear is being disengaged, the next is already in position. The gear shift takes mere milliseconds – roughly the blink of an eye – ensuring no loss of traction force. The permanent engine connection facilitates outstanding acceleration that will take your breath away. And the automatic mode quickly and precisely selects the most efficient gears to considerably lower fuel consumption. The barely perceptible gear changes markedly improve acceleration and passenger comfort. Of course you can also use the gearshift paddles on the sport leather steering wheel to manually control the eight-speed sport automatic transmission or the sport automatic transmission with double clutch.

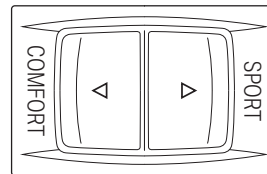

In the seven-speed sport automatic transmission with double clutch, even and uneven gears are distributed across two power trains. So while one gear is being disengaged, the next is already in position – meaning the fastest of shifts with a maximum of precision.

THE BMW Z4: RULER OF ALL ROADS.

There are some roads that are naturally beautiful. But in the BMW Z4 Roadster, all kinds of road will become a joy to travel. The perfectly tuned chassis and suspension ensure excellent road contact and eliminate disturbances caused by rough or uneven surfaces. So you will always arrive relaxed at your destination – even after a long journey. Keen to exchange this comfortable touring car for a thrilling sports car? In the BMW Z4 Roadster all it takes is the push of a button: the Driving Experience Control unifies countless driving dynamics components and affects the entire ride – more noticeably and comprehensively than hardly any other comparable system.

After switching to the Sport mode with its more sensitive steering, taking bends is an even greater thrill. On straights you will notice how spontaneously the accelerator pedal reacts and with the optional automatic transmission you will be able to make even faster gear shifts to further increase the BMW Z4's sporty handling. But that's just the beginning. The Sport+ mode takes you to the edge of extreme athletic driving without compromising controllability and safety. This is achieved by a greater degree of slippage on the rear wheels – which can also be manually activated at any time via a separate "Traction" button. In addition, the Dynamic Stability Control can be completely deactivated at the touch of a button (DSC off). Here, an electronic limited slip differential enables powerful acceleration out of bends and hairpins. The result is breathtaking agility, which can be taken one step further still: the optionally available Adaptive M suspension (standard in the Z4 sDrive35is) provides even more precise handling, as the driver can adjust the damper and the system automatically compensates for irregularities of the road surface.

DON'T LET IT RAIN ON YOUR PARADE.

Sunshine can turn to storms in the blink of an eye – but you won't be caught out: the BMW Z4 is ready for anything. Its fully retractable hardtop can react lightning-fast to changes in the weather. At speeds of up to 40 km/h, it automatically closes in just 19 seconds and opens again in just 22 seconds. Inside, a pleasant temperature is constantly maintained, and noise from outside is audibly reduced. And as you would expect from BMW, the hardtop also has a positive effect on driving dynamics: made of lightweight aluminium, it helps keep the vehicle's centre of gravity low. So you can leave the grey skies far behind.

TWO SEATS. ELEVEN PLACES.

□ Coat hook (both sides)

□ Through-loading system with transport bag

■ Storage compartment behind the seats

□ Storage compartment in the partition

□ Driver's side folding compartment

□ Cup holder under the centre armrest

■ Folding compartment on the instrument panel*

■ Storage compartments in the centre console

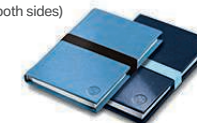

■ Glove compartment

□ Net in the passenger footwell

■ Door trim folding compartment (both sides)

The BMW Z4 comes equipped with everything needed to make driving a roadster an unforgettable experience. But it still has an amazing amount of space for all your bags and other paraphernalia. When the roof is closed, the storage compartment can accommodate a golf bag or up to four crates. And the BMW Z4 is the first roadster with a retractable roof to be fitted, as an option, with a through-loading system and a transport bag. This provides space for a second golf bag (46") for example, or – even when the roof is open – two pairs of skis (max. 170 cm). There is another generous storage space behind the seatbacks, where small objects can be kept in a net, or bulkier objects secured with fastening points.

The optional storage package gives you a whole host of extra storage options, for sunglasses, jackets or drinks, so you have everything handy when behind the wheel. For more information about the BMW Lifestyle range, visit www.bmw-shop.com

Certain equipment combinations may compromise storage options. Your BMW partner will be happy to provide you with more information.
* Not available in conjunction with a BMW navigation system.

ALL-ROUND PROTECTION EVEN WITH THE WIND IN YOUR HAIR.

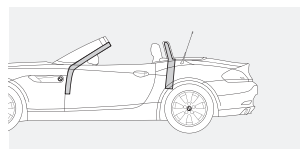

A host of reassuring safety features in the BMW Z4 allows you to enjoy your drive with total peace of mind. For instance, there are innovative lighting technologies to help you avoid collisions. Xenon Headlights and the optional Adaptive Headlights highlight obstacles in your path. And if you have to perform an emergency braking manoeuvre, the Dynamic Braking Lights provide the necessary warning to the vehicles behind.

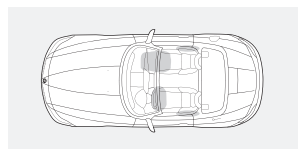

Should an accident occur, the high-rigidity passenger cell with its heavy-duty beam framework is key in guaranteeing passenger safety. With reinforced side-impact protection, particularly stable A-pillars and fixed rollover bars, you can be sure of complete protection even when the top is down.

But the BMW Z4's safety features do not stop there – there is also a series of features to assist passengers in the crucial moments after an accident: with the BMW ConnectedDrive* option, the vehicle can automatically notify the relevant emergency services*, and communicate both the position of the vehicle to the exact metre, and the approximate severity of the accident. So the help you need can arrive faster.

* May not be available in all countries. Please consult your BMW partner.

Should the car go into a roll, you can rely on the stable A-pillars and the rollover bars fixed behind the headrests.

Specially developed head and upper-body airbags cushion the head, ribcage and pelvis area in the event of a collision.

iDRIVE. THE MODERN EXPRESSION OF INTUITION.

In conjunction with the optional Navigation system Professional, the BMW Z4 Roadster features the latest-generation iDrive. This combines the control of all entertainment and communication functions and sets benchmarks in operating comfort. The underlying principle of iDrive is the separation of the controls and the display, creating an ergonomic optimum: the controls are within easy reach on the centre console, while the Control Display is at optimal viewing height and distance next to the instrument panel.

The Controller has been designed according to state-of-the-art biomechanical principles. Its "tilt, rotate and push" operating logic follows principles used in computing, enabling users to operate it intuitively without requiring time to get used to it. The direct menu control buttons above the Controller can be used to directly control the four most frequently used main menu items – CD, radio, telephone and navigation. In addition, you can use eight freely programmable functional bookmarks to store your choice of settings – from your

preferred radio station or a particular CD track to the telephone numbers or navigation destinations you use most frequently. For even more convenience, iDrive also features optionally available voice recognition.

With the Navigation system Professional, the functions and settings are shown on a high-resolution, 8.8" monitor that ensures optimum readability and clarity. Menu items are arranged in graphically clear and standardised form. Visual operating aids, such as an image of the Controller or a display of all the current control options, make it even easier to find your way around. High resolution is not the only impressive thing about the anti-glare display – thanks to 3D travel maps and photorealistic representations of selected points of interest, navigation turns into a visually fascinating experience.

www.bmw.com/technologyguide

BMW CONNECTED DRIVE* – MORE CONVENIENCE,
INFOTAINMENT AND SAFETY.

Our world is becoming more closely connected every day. BMW drivers are used to the fact that their vehicle and their world are connected – that they can request information, communicate via telephone or email and always be up to date while they're on the go. The BMW ConnectedDrive option ensures that the driver and the vehicle remain in perfect touch with the rest of the world – at all times and in all places. A few highlights from the categories of convenience, infotainment and safety are displayed here. For a comprehensive overview of the features available with BMW ConnectedDrive, visit www.bmw.com/ConnectedDrive

Revolutionising mobile networking. The BMW Vision ConnectedDrive is a visionary roadster with a design that exhilarates from the very first glance. Its dynamic, flowing contours lead the eye from the striking front and along the stretched bonnet of this extraordinary vehicle – a synthesis of exterior and interior. Each of the three levels of the interior stands for one of three BMW ConnectedDrive components – convenience, infotainment and safety. The accompanying functions and controls are illuminated in different colours, which literally radiate a pulsating array of information. More information about this concept vehicle and further research projects is available in the new Future Lab.

www.bmw.com/futurelab

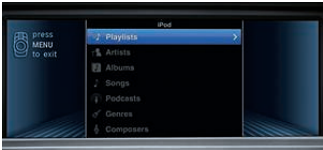

Convenience.

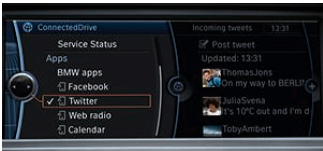

Comfort Access, including exterior door handle illumination. This system allows you to unlock, lock and start your BMW without inserting the key. All you need is the remote control in your pocket, which transmits an identification signal to the car. Simply touch the door handle or boot lid and the BMW unlocks or locks as required. Similarly, a touch of the Start/Stop button is all it takes to start the engine.

Infotainment.

Plugin. With your iPhone and the Apps option, you'll always be up to date – and of course this applies equally when you use it inside your BMW. Through Plugin, you have direct and easy access to all menu items, you can use advanced functions such as the playback of Genius mixes and display album covers. And whenever you add iPod updates to your iPhone, they can be used in your car immediately via BMW ConnectedDrive. Thanks to this interface technology, the use of mobile devices in cars is innovative, more convenient and safer.

BMW Connected App. For the first time, you can now use apps in your BMW. With the Apps option, an iPhone and the free BMW Connected App from the Apple App Store, you're no longer limited to just listening to local radio, your calendar is with you all the time and you're always in contact with your friends. Using the iDrive system, you can easily select web radio stations from around the world. You can also call up the latest status reports from your Facebook or Twitter accounts and view upcoming appointments on the Control Display, or even have them read to you through the audio system's speakers. And that's just the beginning, more functions and apps will follow in the future.

Safety.

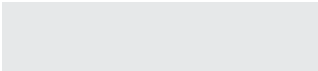

High-Beam Assistant. The optional High-Beam Assistant detects sources of light in the vehicle's vicinity and switches between high and low beam according to the traffic situation. When the system is active, an image sensor behind the interior mirror monitors traffic and light conditions. Based on these sensor images, the assistant function decides whether or not the high beam should be switched on. When it detects vehicles ahead, or finds that ambient light is sufficient, the high beam is switched to low again.

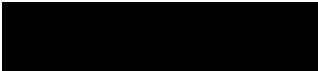

* May not be available in all countries. Please consult your BMW partner.

The models illustrated in this brochure show the specifications and configurations (standard and optional equipment) of vehicles produced by BMW AG for the German market. According to the specific requirements of other markets, alterations in models, standard and optional equipment, as described in this brochure, may occur. For precise information on country-specific vehicle versions please contact your local BMW partner. Subject to change in design and equipment. Subject to error.

Please note that even normal long or short term use can lead to unrecoverable upholstery damage. This can be caused in particular by non-colourfast clothing.

THE BMW Z4 sDRIVE35is. DYNAMISM IN A NEW DIMENSION.

The BMW Z4 sDrive35is embodies uncompromising driving pleasure. Boasting BMW TwinPower Turbo technology, the BMW Z4 sDrive35is rolls out with an impressive 250 kW (340 hp) and powerful torque of up to 450 Nm – and the boost function pushes it briefly all the way to 500 Nm. With its standard seven-speed sport automatic transmission with double clutch, the six-cylinder in-line engine rockets without a break in torque at engine speeds of up to 7,000 rpm from 0 to 100 km/h in only 4.8 seconds – and consumes on average only 9.0 litres¹ over 100 km, with CO₂ emissions of 210 g/km. And this concentrated dynamism visibly radiates from the Z4 sDrive35is. The M Sport package, included as standard, and the 18" light alloy wheels in Star-spoke styling 295 with mixed tyres emphasise the car's overall athleticism. An impression reinforced by the imposing bonnet, short overhangs and the low-slung seating position near the rear axle. The exterior mirrors in Oxide Silver, matt, and the exclusive modified M Aerodynamics package in body colour, consisting of a front apron with integrated finisher struts in Aluminium, matt, as well as a rear apron with a black painted diffuser complete this uncompromisingly sporty look.

The standard adaptive M Sport suspension ensures an optimum position on the road. And the cockpit offers perfect conditions for high-performance, with its M driver foot support and exclusive speedometer display in Grey with sDrive35is lettering. In the BMW Z4 sDrive35is you can also expect Kansas leather upholstery, shown here in Walnut (available as an option for all BMW Z4 models) as well as a sporty interior trim in Aluminium Carbon. Sport seats for driver and front passenger offer optimum lateral support and, in conjunction with the M leather steering wheel with multifunction buttons and monodirectional gearshift paddles and the M door sill finishers, contribute to a distinctly sporting ambience. Floor mats with grey piping and model signature together with the BMW Individual roofliner in Anthracite round off the attractive interior design.

¹ In a combined EU test cycle.

YOU CAN TELL REAL ATHLETES BY THEIR APPEARANCE. THE BMW Z4 M SPORT PACKAGE.

Whatever engine version you have in mind for your BMW Z4, with the exclusive M Sport package you can lend this timelessly elegant roadster an even more dynamic appearance, supplementing your vehicle with excellent aerodynamic qualities and a host of athletic details. Key in creating this impression are the M Aerodynamics package with the specially shaped front and rear aprons, and 18" M light alloy wheels in Star-spoke styling 325 M with mixed tyres. 19" M light alloy wheels in Double-spoke styling 326 M, as shown above right, are available as an optional extra. The M leather steering wheel guarantees a firm grip, and the M Sport suspension likewise included in the package delivers impressively agile road positioning. On top of all these features, the BMW Z4 exudes even more self-confidence when decked out in striking Melbourne Red metallic (optional), a finish reserved exclusively for the M Sport package. In the interior, once you have opted for the M Sport package you can look forward to sport seats for the driver and front passenger, M door sill finishers, an M footrest, the BMW Individual roofliner in Anthracite, as well as an attractive interior trim in Aluminium Carbon.

The rim on the M leather steering wheel has especially good grip. With the integrated multi-function buttons you can operate the radio, CD player and optional telephone while driving.

The M manual gear lever knob with M emblem is exclusive to the M Sport package.

The M door sill finishers set a sporty tone.

STRIKINGLY SPORTY.

The BMW Z4 oozes power with the Titanium Silver metallic paint finish. 17" light alloy wheels in Turbine style 292 with mixed tyres emphasise its dynamic character. The Coral Red Kansas leather upholstery provides a particularly stunning contrast and the interior trim in Fine Brushed Aluminium completes the interior's refined athletic atmosphere.

SOPHISTICATED LUXURY.

This too is the BMW Z4: in an Orion Silver metallic finish with filigree 19" light alloy wheels in V-spoke styling 296, it exudes timeless elegance. In the exclusive interior, fine-wood elements in Ash Grain caress the senses – the seat upholstery features fine Kansas leather in Canberra Beige.

DESIGN PURE BALANCE – EXCLUSIVELY FOR SELECTED CUSTOMERS: YOU, FOR INSTANCE.

For the first time, the Design Pure Balance equipment package is available for the BMW Z4. A particularly high-quality, harmonious combination of colours and materials. It begins with the recommended Mineral White metallic paint finish, which makes a radiantly bright impression. Of course, you can also combine the Design Pure Balance with other exterior colours. The interior of the BMW Z4 in Cohiba Brown, for example, creates an exquisite contrast. You'll be surrounded by extended velvety Merino leather. The door shoulders and the top of the instrument panel are upholstered in Cohiba Brown leather, with the sunblinds in the same high-quality material in black. Cohiba Brown creates an atmosphere of extraordinary elegance, which can be stylishly combined with the anthracite Finesline fine-wood trim used in the interior. The package also includes exclusive sport seats providing excellent support in every driving situation.

DESIGN PURE IMPULSE – MAKES AN INDIVIDUAL STATEMENT IN THE COCKPIT AND ON THE ROAD.

If your heart beats faster at the prospect of sporty open-air driving coupled with an expressive design, you will love the Design Pure Impulse design package for the BMW Z4 Roadster. Selected extras – such as sport seats covered in high-quality Black Nappa leather as part of the Circuit Alcantara/leather combination with yellow detailing and the BMW Individual Piano Finish Black interior trim – afford the cockpit an athletic aura. As do the yellow contrasting stitching on the dashboard, the door inserts in yellow Alcantara and the high-contrast BMW Individual roofliner in Anthracite. And from the outside, individualists will fall for the striking appearance of the optional exclusive Atacama Yellow paint finish. Design Pure Impulse can also be combined with a range of other metallic and non-metallic exterior colours.

■ Standard equipment □ Optional equipment

■ **Xenon Headlights for high and low beam**, incl. four light rings used as daytime running lights and automatic headlight range control, for optimal illumination of the road ahead at night and when visibility is poor.

□ **Adaptive Headlights** with variable light distribution use electro-mechanical control of the moving headlights to provide optimum illumination of corners as soon as the driver turns into the bend. Variable light distribution is a standard feature of this equipment package. It illuminates a wider or narrower section of the road depending on your speed.

□ **High-Beam Assistant** supports the driver at night by automatically switching to low beam when there is oncoming traffic or another car ahead, or when the road is sufficiently illuminated.

□ **Lights package** encompasses door exit lights and handle-area illumination, which lights up the entryway for 20 seconds when the doors are unlocked for added convenience in the dark. Also includes storage compartment illumination, ambient lighting, reading lights and footwell lighting.

□ **Exterior mirror package** with mirrors that can be folded in automatically using the integrated electric fold-in function (e.g. in a carwash), and can then be folded back into position at the touch of a button, incl. parking function for passenger-side mirror.

□ **Interior mirror** with automatic anti-glare function. Automatically dims when light from following cars exceeds a specified intensity.

■ **Retractable hardtop** can be quickly opened at the touch of a button (opens and closes only when vehicle is stationary).

□ **Wind deflector** lets you enjoy open-top driving without annoying drafts and turbulence in the shoulder and neck area; the wind deflector is easy to operate and can be stowed compactly in the luggage compartment.

■ **17" light alloy wheels Star-spoke 290**, 8 J x 17 with 225/45 R 17 runflat tyres (standard with Z4 sDrive20i and Z4 sDrive28i).

□ **17" light alloy wheels Turbine style 292** with mixed runflat tyres, front 8 J x 17 with 225/45 R 17 tyres, rear 8.5 J x 17 with 255/40 R 17 tyres.

□ **18" light alloy wheels multi-spoke 293** with mixed runflat tyres, front 8 J x 18 with 225/40 R 18 tyres, rear 8.5 J x 18 with 255/35 R 18 tyres (standard with Z4 sDrive35i).

□ **18" composite light alloy wheels V-spoke 294**, bolted, with mixed runflat tyres, front 8 J x 18 with 225/40 R 18 tyres, rear 8.5 J x 18 with 255/35 R 18 tyres.

□ **19" light alloy wheels V-spoke 296¹** with mixed runflat tyres, front 8 J x 19 with 225/35 R 19 tyres, rear 9 J x 19 with 255/30 R 19 tyres.

■ **18" light alloy wheels Star-spoke 295** with mixed runflat tyres, front 8 J x 18 with 225/40 R 18 tyres, rear 8.5 J x 18 with 255/35 R 18 tyres (exclusive to the Z4 sDrive35is).

□ **18" M light alloy wheels Star-spoke 325 M²** with mixed runflat tyres, front 8 J x 18 with 225/40 R 18 tyres, rear 8.5 J x 18 with 255/35 R 18 tyres.

□ **19" M light alloy wheels Double-spoke 326 M¹³** with mixed runflat tyres, front 8 J x 19 with 225/35 R 19 tyres, rear 9 J x 19 with 255/30 R 19 tyres.

¹ Wheel/tyre combination with high-performance look and limited suspension and roll comfort.

² Available with the M Sport package, optional for the Z4 sDrive35is.

³ Only available in conjunction with the M Sport package or Z4 sDrive35is.

□ **Sport seats for driver and front passenger** (shown here with optionally available Cohiba Brown Merino leather) with manual adjustment for seat length position, seat height, seat and seatback angle, and thigh rest; the electrically adjustable lateral supports give optimal side support for people of all sizes when cornering (standard with Z4 sDrive35is).

□ **Lumbar support for driver and front passenger seats**, electrically adjustable in height and depth to provide a perfect ergonomic seating position and support for your back muscles.

■ **Armrest**, foldable, with capacious storage compartment.

■ **Standard seats** (shown here with optionally available Coral Red Kansas leather) with integrated fixed headrests and long adjustable range for seat length position as well as individually adjustable seat height and backrest angle.

□ **Seat adjustment, electric**, for driver and front passenger seats incl. two memory positions for the driver's seat.

□ **ISOFIX child seat attachment** for passenger seat. Front passenger airbag can be deactivated.

□ **Seat heating for driver and front passenger** (three phase); seat, backrest and lateral supports can be heated to provide a comfortable warmth only moments into your drive (standard with Z4 sDrive28i, Z4 sDrive35i and Z4 sDrive35is).

■ **Sport leather steering wheel**. The use of SunReflective Technology ensures that the leather steering wheel rim never becomes uncomfortable to the touch when heated by direct sunlight.

■ **Multifunction buttons for sport leather steering wheel**, control of radio, CD drive and telephone (optional) via integrated buttons – so you can keep your hands on the wheel for safer driving.

□ **Sport leather steering wheel with monodirectional gearshift paddles** in conjunction with automatic transmission for even more dynamic gear shifts.

□ **M leather steering wheel** including M gear lever knob featuring M logo (only in conjunction with six-speed manual transmission).

□ **M leather steering wheel with monodirectional gearshift paddles** in conjunction with automatic transmission for even sportier gear shifts (standard with Z4 sDrive35is).

□ **Steering wheel heating**, just press a button to quickly warm up the steering wheel rim – a particularly pleasant amenity in winter.

■ **Driving Experience Control** allows you to easily switch between the Normal, Sport or Sport+ driving modes. For sporty drivers, this option allows you to sharpen all the vehicle's responses. The system influences the direct feedback from the steering system, the sensitivity of the accelerator and the gearshift timing of the optional automatic transmissions. Additionally, at the push of a button (DSC off) you can deactivate Dynamic Stability Control or change to Traction mode, allowing wheel slip within defined limits for a sportier driving style.

□ **Adaptive M suspension** lowers the chassis by 10 mm and electronically adjusts the dampers (from sportingly tight to relaxed and comfortable) for a further boost to agility and an impressively precise response (standard with Z4 sDrive35is).

■ **Six-speed manual transmission** for an unbelievably athletic driving style. Smooth and optimally synchronised, it boasts precise, short-throw gear shifts. Thanks to the narrow transmission ratios with an additional sixth gear, the engine is even more responsive to your own personal style of driving (not available with Z4 sDrive35is).

□ **Eight-speed sport automatic transmission** for highly convenient and fast gear shifts using the gear lever or the gearshift paddles on the leather steering wheel – for a maximum of driving dynamism and efficient fuel consumption (available with sDrive20i and sDrive28i).

□ **Seven-speed sport automatic transmission with double clutch** for particularly fast gear shifts with no loss of traction, using the gear lever or the gearshift paddles on the leather steering wheel; for optimum driving dynamics and efficient fuel consumption (standard with Z4 sDrive35is, optionally available with Z4 sDrive35i).

■ Standard equipment □ Optional equipment

■ **Air conditioning**, incl. microfilter, provides your ideal environment any time of year. Manual temperature adjustment and air recirculation, seven-phase blowers and knee-level vents.

□ **Automatic air conditioning** (shown here), incl. Automatic Recirculation Control (ARC) with recirculated air filter, sun and precipitation sensor, fully automatic temperature adjustment (two separate controls for driver and front passenger) and additional convertible mode setting.

■ **Radio BMW Business**, 4-channel amplifier, scan function, CD drive, MP3 decoder, automatic volume control, incl. stereo loudspeaker system with six loudspeakers.

□ **Radio BMW Professional** (shown here), like Radio BMW Business, plus connection for a DVD changer and two-line display for extended presentation of telephone numbers, names and audio/MP3 tracks.

□ **DAB tuner** for excellent reception of a large range of digital radio broadcasters, DAB+ compatible.

□ **HiFi loudspeaker system** with digital amplifier (245 watts) and 11 loudspeakers, featuring digital equalizing, to optimally adjust sound to the internal dimensions of the vehicle.

□ **HiFi system Professional**, multi-channel capability, with digital amplifier (650 watts) and a total of 14 loudspeakers for a high-intensity sound experience.

□ **DVD changer** for 6 DVDs, incl. scan function, random play, MP3 decoder, multi-channel capability; installed in the glove compartment.

□ **Navigation system Professional**, incl. DVD drive, iDrive Controller with direct menu control buttons, functional bookmarks, integrated hard disc for audio files and navigation data, RTTI-compatible, 3D map presentation and folding high-resolution 8.8" display.

□ **Voice control system** (available in conjunction with Navigation system Professional) allows you to control functions such as radio station selection, navigation destinations or telephone system entries while on the move. These functions are shown simultaneously in the Control Display.

□ **TV function** allows the Control Display to be used as a television when the vehicle is stationary. Both analogue and digital (DVB-T) programs can be viewed.

□ **BMW Assist***¹ offers a range of services to support the driver: automatic and manual emergency call, RTTI, Google Send to Car and personal Information Service.

□ **BMW Online***¹ provides access to online services (email, customised portals for news and weather, the Google Maps database.).

□ **Internet preparation*** for unrestricted online access when the vehicle is stationary.

□ **Apps*** for integrating iPhone applications including access to services such as Facebook, Twitter and online radio.

□ **Connectivity package** comprises mobile phone preparation with Bluetooth interface² (incl. hands-free kit, sockets for charger and external antenna) and USB/audio interface for a USB stick or MP3 player, as well as the music interface for smartphones. Track titles are shown in the Control Display (only in conjunction with a navigation system).

*May not be available in all countries. Please consult your BMW partner.

¹ Can be used free of charge for the first three years.

² Information on supported devices can be found at www.bmw.com/bluetooth

□ **Through-loading system** with integrated transport bag offers lots of space, an ideal extension of the luggage compartment, incl. ski holder on the sill in the luggage compartment. Even larger objects, such as a second golf bag (46"), can thus be conveniently accommodated. And regardless of whether the hardtop is open or closed, two pairs of skis (max. 170 cm) can still be transported.

□ **Storage package** includes two cup holders under the centre console, a folding compartment on the driver's side, a storage compartment in the separating wall in front of the luggage compartment, nets in both the passenger footwell and on the rear of the seat backrests, a coat hook on each rollover bar and fastening straps in the luggage compartment.

□ **Storage options** for all kinds of objects are provided by: the storage shelf behind the seats, a compartment in the dashboard (for vehicles without a navigation system) and one under the centre console, two trays in the centre console, the fold-out storage compartments in the door panels, the glove compartment and a tray in the luggage compartment.

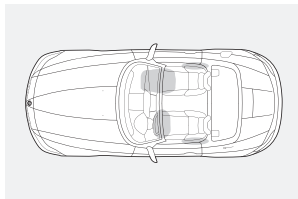

■ **Luggage compartment**, with 180 litre capacity (with hardtop open) or 310 litres when hardtop is closed. When the hardtop is closed the vehicle has room for a 46" golf bag, for example.

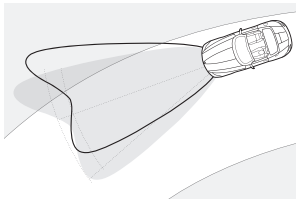

□ **BMW Service Inclusive***. Your BMW partner has intelligent solutions on hand, including for service. With BMW Service Inclusive you entail no further costs for maintenance work for the agreed duration or mileage. For more information visit www.bmw.com/serviceinclusive

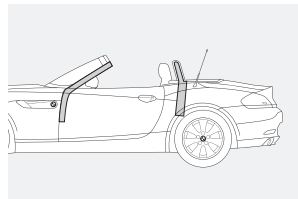

□ **BMW Welt**: taking delivery of a car has always ranked among the best moments for any car driver. Now that moment can become a truly unforgettable day – at the BMW Welt, the experience and delivery centre in Munich, Germany. Visit the Museum, tour the plant or explore the Technology Studio: BMW Welt brings you the true fascination of BMW. Find out more online at www.bmw-welt.com

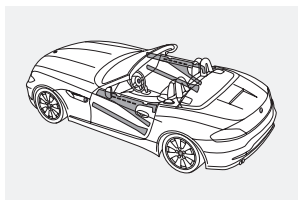

■ **Driver and front passenger airbags** protect head and chest from impact on the steering wheel or dashboard in the event of a head-on collision. The front passenger airbag is equipped with a seat occupancy detector. The side airbag (head/upper body) significantly reduces the risk of injury to the head, ribcage and pelvis area in the event of a side-on collision.

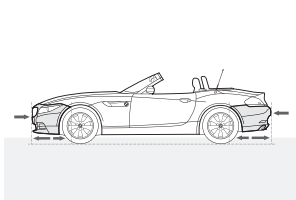

□ **Adaptive Headlights with variable light distribution** feature moving headlights that optimise road illumination in bends. This enhances safety when driving at night or in bad visibility. Sensors register the steering angle, yaw rate and vehicle speed, and the direction of the headlight beams is automatically adjusted to match the calculated layout of the bend.

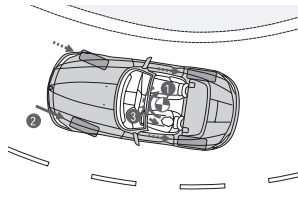

■ **Rollover protection system** comprises two steel rollover bars behind the headrests, together with a high-tensile chassis cross member. The system also includes a rollover bar of tubular steel integrated into the windscreen cowl and A-pillars.

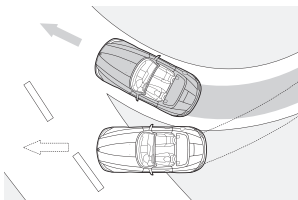

■ **Side impact protection** with strengthened door cross members around the seat and backrest areas and a seat structure specially designed for an impact all increase protection for the occupants.

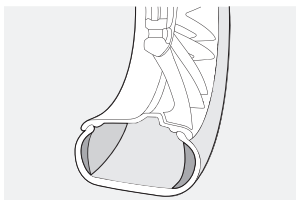

■ **Bumpers** with reversible aluminium impact absorbers and replaceable deformation elements at the front and rear absorb impacts of up to 15 km/h without damage to the body; energy-absorbing foam in the bumpers at the front absorbs impacts of up to 4 km/h without damage.

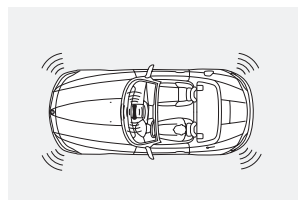

■ **Cornering Brake Control (CBC)** increases vehicle stability when braking gently in a fast bend. During braking manoeuvres, the load on the rear wheels is reduced, which can lead to oversteering (1). In brake manoeuvres that are outside the ABS control range, CBC addresses this tendency using asymmetric brake pressure control (2) in order to create a stabilising counterforce (3).

■ **Dynamic Stability Control (DSC)** incl. CBC, Brake Assistant and additional functions. DSC detects any risk of skidding early on and stabilises the car in milliseconds. Traction Mode (DTC) permits increased wheel slip, in order to maximise propulsion in specific situations and enable a sportier driving style. In DSC-off mode, an electronic limited slip differential improves driving characteristics.

■ **Runflat tyres:** the reinforced walls mean that the tyres do not immediately deflate when air pressure is reduced, and do not loosen from the rims. The **runflat indicator** comes as standard and minimises the danger resulting from a tyre defect. An indicator light on the dashboard warns the driver of any slight drop in pressure; an acoustic signal warns of a dramatic drop in pressure.

■ **Crash sensor** overrides the central lock function in the event of an accident (the doors can then be opened), the interior lights and warning blinkers are switched on, and the safety battery terminal clamp is activated.

* Fuel consumption and CO₂ emissions may vary by country.

¹ Standard with seven-speed sport automatic transmission with double clutch.

² The value given includes a 90% full tank as well as 68 kg for the driver and 7 kg for luggage. Unladen weight applies to vehicles with standard equipment. Optional extras may increase these figures.

³ The BMW Z4 engines are designed to run on RON 95 fuel. They may be run on RON 91 fuel with a slight decrease in performance. Unleaded fuels of 91 RON and higher with a maximum ethanol percentage of 10% (E10) are permissible. Performance and consumption figures apply to RON 98 fuel.

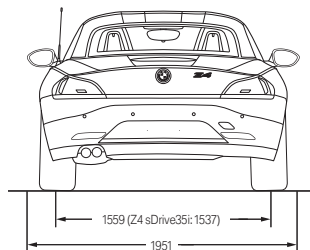

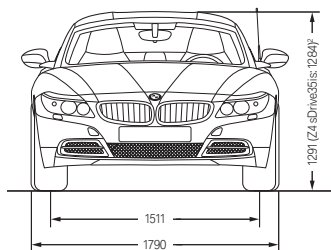

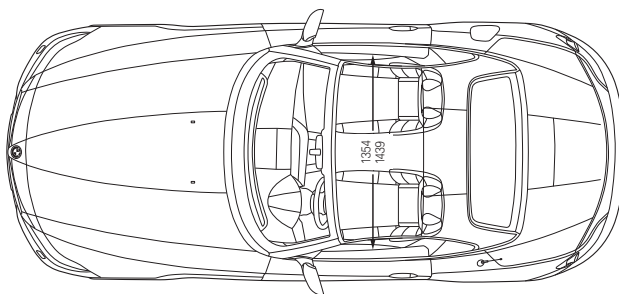

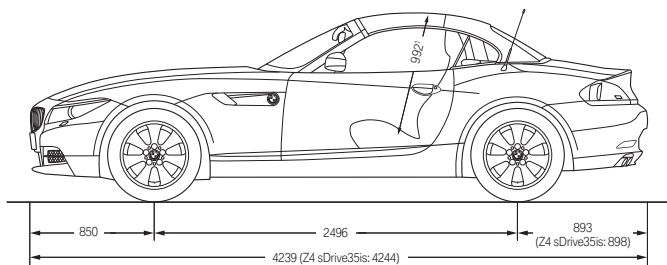

⁴ Maximum torque with overboost function temporarily 500 Nm.

⁵ Electronically limited.

⁶ All BMW Z4 models comply with the EU5 emissions standard. Fuel consumption is determined according to the ECE combined driving cycle (93/116/EC). This consists of approx. one third urban driving and two thirds extra-urban driving (measured in terms of distance). CO₂ emissions are measured in addition to fuel consumption. Optional equipment can increase these figures. For more information on fuel consumption and CO₂ emissions, please consult your BMW partner.

⁷ For information on recommended devices see www.bmw.com/bluetooth

Values in [] refer to vehicles with automatic transmission.

All dimensions in the technical drawings are given in millimetres. Luggage compartment capacity from 180 litres (hardtop open) to 310 litres (hardtop closed).

¹ Maximum headroom.

² Max. height while opening roof 1,800 mm.

EQUIPPED WITH ALL THE BEST IDEAS. ORIGINAL BMW ACCESSORIES*.

Black front ornamental grille emphasises the sporty look. Carbon front splitter perfectly matched with the design line.

Cup holder can be attached to the centre console.

Illuminated aluminium door sills. Aluminium pedal mounts, Progressive floor mats.

The BMW Service concept: always up to speed. When you buy a BMW, you can look forward to superb service and comprehensive customer care, with a worldwide network of more than 3,300 BMW Service partners in more than 150 countries ready to assist you at any time. The vehicle's on-board diagnostics keep you informed of when the car is next due for a check-up and what work needs to be done: **Condition-Based Service (CBS)** tracks service fluids and the condition of essential parts subject to wear. It also monitors the time- and mileage-linked service requirements of your BMW. Using these measurement data, the Info Display in the cockpit automatically alerts you in advance whenever

any part of the vehicle requires servicing. The iDrive Control Display contains exact information on which vehicle components will need to be serviced and when. In conjunction with BMW TeleServices*, the innovative telematics service provided by BMW Service, the CBS data are automatically transmitted to your BMW Service partner. This means that your service consultant has more time for you, and can provide more comprehensive advice. Your BMW Service partner will of course have **Original BMW Parts** available for any work to be done. In short: quality and safety are our top priorities.

TAILOR-MADE FOR YOUR VEHICLE. BMW SERVICE.

BMW Service Inclusive*. Service costs are another area where your BMW Service partner can offer you an intelligent solution. With BMW Service Inclusive, routine maintenance service will be provided at no extra cost to you, for the agreed duration or mileage. Find out more online at

www.bmw.com/serviceinclusive

With **BMW TeleServices***, you are always in safe hands. This feature enables your BMW to contact your BMW Service partner and register itself for a service appointment. As soon as the CBS sensors detect a service requirement, the vehicle will initiate an automatic BMW Teleservice call and transmit all service-related data – data which previously had to be collected in the workshop. Your service consultant will then call you back, in order to arrange an appointment. As vehicle information is transferred in advance, time in the garage can be spent more efficiently, so your BMW is back on the road faster. In the unlikely event of a breakdown, BMW TeleServices enables you to transmit diagnostics, vehicle and location data directly to BMW breakdown assistance. With BMW Teleservice Assistance, malfunctions can often be remedied remotely, getting you quickly and easily back on the road. For further information, visit

www.bmw.com/teleservices

Mobile Service*: in the event of a breakdown, BMW Mobile Service is at your disposal round the clock. Specially trained BMW technicians will do everything necessary to get your BMW back on the road, with telephone or on-site assistance as needed. Simply contact BMW Mobile Service. In addition, all BMW vehicles newly registered from 1 January 2011, have a comprehensive 24-month mobility service in line with the applicable BMW Mobile Care warranty conditions (including towing, rental car, taxi, hotel accommodation and vehicle return). This BMW mobility warranty is automatically extended by another 24 months if you have the scheduled engine oil service performed by your authorised BMW Service partner – for up to 5 years after initial vehicle registration. More detailed information is available from your BMW Service partner or online at

www.bmw.com/mobileservice

BMW Financial Services. If there's one more thing you could wish for to go with your BMW, it could simply be the perfect financing solution – one that leaves you with enough room for the other good things in life. BMW Financial Services provides you with personalised leasing, finance and insurance options – tailored to your requirements and budget. But we offer you more than just favourable conditions. Take for example the components of our leasing package, which include courtesy vehicles and insurance. For further information please visit www.bmwfs.com. Find out more – your BMW partner will be pleased to make you an individual offer for your desired car.

SHAPING THE FUTURE – RESPONSIBLY.

The BMW Group has been ranked the most sustainable automotive company worldwide in the Dow Jones Sustainability Index for the seventh time in a row, because sustainability is an integral part of our value chain – it encompasses every stage from the development of fuel-saving and alternative vehicle concepts to environmentally friendly production processes and recycling. Our research and development philosophy BMW EfficientDynamics delivers tangible benefits to customers, our climate and the environment. Since 1995, for example, our European new-vehicle fleet's CO₂ emissions have dropped by around 30%.

EXPERIENCE MORE WITH BMW.

BMW Magazine: information and entertainment. Competent and comprehensive, the BMW Magazine brings you all the latest news from the world of BMW. You will receive two issues per year free of charge when you purchase a new BMW.

BMW Driving Experience: "Learn how to enhance your driving pleasure." Driving a BMW should be fun. And like any other piece of sport equipment, the better you are able to control it, the more fun it is. The BMW Driving Experience teaches you – on road and off, in snow and ice, or even in the Namibian desert – how far you can push your BMW, while still remaining perfectly safe. Topics range from BMW Safety and Snow and Ice to M Race Track Training on one of the toughest race tracks in the world – the Nürburgring. More information is available at www.bmw-drivingexperience.com

BMW Welt: joy has a home. Visit Munich, home to the BMW brand for over 90 years, and pick up your new BMW at BMW Welt. There you'll be able to experience BMW with all five senses and see your new BMW for the first time with your own eyes. BMW Welt offers you a tailor-made visitor programme. From relaxing in the Premium Lounge to a factory tour or a visit to the BMW Museum – there are plenty of unique experiences to perfectly complement the hand-over of your new car. It's more than worth it. Visit us online today at www.bmw-welt.com. Your local BMW partner can also provide you with further information. We look forward to seeing you.

BMW TV: your source for all things BMW. This is where you can get to know the brand in all its facets, through comprehensive features, portraits, and background reports. www.bmw.tv/com provides you with up-to-date and entertaining information on automobiles, innovations, motor shows, events, sports, and lifestyle topics.

But we are still aiming for more: over the period from 2006 to 2012, we aim to reduce the amount of resources – such as water and energy – consumed by our vehicle manufacturing operations by 30% per vehicle. In our engine plant in Steyr, Austria, we are already one step further: since 2007, production there has generated no waste water at all.

And of course each of our vehicles is designed for easy and economical recycling after its long running life. Please contact your BMW partner on all matters regarding your end-of-life vehicle. Further information on this topic is also available on our website.
